How to Catch a Killer Katherine Ramsland, 2021-07-13 There are two parts to every crime story: how they did it and why they got caught. This book is about the second part and how it changes the way we catch serial killers. No two stories about the capture of a serial killer are the same. Sometimes the killers make crucial mistakes; other times investigators get lucky. And the process of profiling, hunting, and apprehending these predators has changed radically over time, particularly in the field of criminal forensics, which has exploded in the last ten to 15 years. Laser ablation, video spectral analysis, cyber sleuthing, and even DNA-based genetic genealogy are now crucial tools in solving murders, including the recent capture of the so-called Golden State Killer. This book, in the new *Profiles in Crime* series, tells the history of forensics through the capture stories of some of the most notorious serial killers going back almost a century. The killers include Rodney Alcala, a serial rapist and murderer sometimes called the Dating Game killer for his appearance on that TV show; No one knows the exact number of his victims; Takahiro Shiraishi, the suicide killer from Zama, Japan, who dismembered nine victims and stored their bodies in his refrigerator; Aileen Wuornos, one of the rare female serial killers. She shot seven men in Florida and was turned in by an accomplice; Jeffrey Dahmer, the Milwaukee Cannibal; and Bobby Joe Long, both identified by survivors Ted Bundy and David Berkowitz, Son of Sam, who both made mistakes. Ludwig Tesson, who killed several children in Germany and was caught through new methods in forensic investigation that could distinguish human from animal blood.
