O. Pritchard,Matthias Klumpp,Ulrich Teichler,2015-11-03 Diversity and excellence in Higher Education seem to be conflicting concepts Nevertheless they are dynamic and closely intertwined indeed they may even require each other The book brings together insights from ten different countries to analyse these multi faceted phenomena and discuss how they may be reconciled within higher education To set the overall context it critically addresses markets and managerialism whilst foregrounding the dangers of certain behavior that European countries are currently though often unwisely copying from the U S In a mass Higher Education system the social basis of the student body diversifies a fact that creates new challenges for planners and managers The authors study of diversity concentrates particularly upon issues of equity and justice for students addressing their life cycle transitions from school to higher education degree completion postgraduate education and employability It also considers challenges posed by diversification at the institutional level encompassing changes in management leadership governance and performance assessment It addresses attempts to achieve
