Early Childhood Mathematics Skill Development in the Home Environment Belinda Blevins-Knabe, Ann M. Berghout
Austin, 2016-10-17 This volume presents current research on the connections between the home and family environment on children's mathematics development. Focusing on infancy through first grade, it details the role of parents and other caregivers in promoting numeracy and the ways their active participation can prepare young children for learning about formal mathematics. Research data answer key questions regarding the development of numeracy alongside cognitive and linguistic skills, early acquisition of specific math skills, and numeracy of children with atypical language skills. The book also provides practical recommendations for parents and other caregivers as well as implications for future research studies and curriculum design. Included in the coverage: Ways to optimize home numeracy environments; Individual differences in numerical abilities; Cross-cultural comparisons and ways to scaffold young children's mathematical skills; Mathematics and language in the home environment; Center-based and family-based child care; Games and home numeracy practice. *Early Childhood Mathematics Skill Development in the Home Environment* is an essential resource for researchers, graduate students, and professionals in infancy and early childhood development, child and school psychology, early childhood education, social work, mathematics education, and educational psychology.

Early Childhood Education in Chinese Societies Nirmala Rao, Jing Zhou, Jin Sun, 2017-01-20 This book provides an up-to-date account of relevant early childhood policy and practice in five Chinese societies: the People's Republic of China or Mainland China, Hong Kong, Macao, Singapore, and Taiwan. It analyses how traditional Chinese values, Eastern and Western curricular approaches, and socio-political, economic, cultural, and demographic changes influence current policies, services, and practice. It addresses responses to global concerns about the excluded and disadvantaged and about quality, and explains lessons from and for Chinese early childhood education. This book is the first English language research-based review of early childhood education and the factors that affect it in different Chinese societies. It is particularly timely given the increased recognition of the importance of early childhood education for human capital development globally and the international interest in understanding early education in Chinese societies.
