Lee, 2022-01-01 This book examines student mobility within Africa International student mobility is among the central activities of higher education internationalization As the number of international students increase so do the destinations in both number and geographic diversity Historically international student mobility has followed South North and North North patterns However recent literature show the growth in North South and South South patterns of student mobility There has also been a rise in regional mobility In what is referred to in the book as intra Africa mobility the books explores and analyzes the patterns of intra Africa mobility based on seven African countries South Africa Kenya Uganda Nigeria Ghana Senegal and Egypt The editors and contributors address three central research questions Why did the students choose the country they are studying in Why did they choose the institution they are studying in What are their academic and social experiences in these countries and their respective institutions This book is the first comprehensive exploration of intra Africa student mobility in a field that traditionally centers on the Global North

**Power / Knowledge / Land** Laura German, 2022-10-10 The 2008 outcry over the global land grab made headlines around the world leading to a sustained interest in the dynamics and fate of customary land among both academics and development practitioners In Power Knowledge Land author Laura German profiles the consolidation of a global knowledge regime surrounding land and its governance within international development circles in the decade following this outcry and the growing enrollment of previously antagonistic actors within it Drawing theoretical insights on the inseparability of power and knowledge German reveals the dynamics of knowledge practices that have enabled the longstanding project of commodifying customary land and the more contemporary interests in acquiring and financializing it to be advanced and legitimated by capturing the energies of socially progressive forces By bringing theories of change from the emergent land governance orthodoxy into dialogue with the ethnographic evidence from across the African continent and beyond concepts masquerading as universal and self evident truths are provincialized and their role in commodifying customary land and entrenching colonial futurities put on display In doing so the volume brings wider academic debates surrounding productive forms of power into the heart of the land grab debate while enhancing their accessibility to a wider audience Power Knowledge Land takes current scholarly debates surrounding land grabs beyond their theoretical moorings in critical agrarian studies political economy and globalization into contemporary debates surrounding the politics of knowledge from theories of coloniality to ontological anthropology thereby enabling new dynamics of the phenomenon to be revealed The book deploys a pioneering epistemology integrating deconstructionist approaches to reveal the tactics truth claims and ontological assumptions of global knowledge brokers with systematic qualitative reviews and comparative study to contrast these dominant constructs with the evidence and reveal alternative ways of knowing land and practicing security from the ethnographic literature This helps to reveal the Western and

modernist biases in the narratives that have been advanced about women custom and security revealing how the colonality of knowledge works to grease the wheels of land takings by advancing highly provincialized constructs aligned with western interests as universal truths      Annuaire Des Organisations Internationales ,
