Military Intake 2015 South Africa:

South Africa's Post-Apartheid Military Lindy Heineken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged. HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world.

Market and Violence Heide Gerstenberger, 2022-10-10 Winner of the Deutscher Memorial Prize 2023. Despite their many disagreements when it comes to the subject of capitalism, Marxist and market liberal approaches seem to agree about one thing: the economic structures of capitalist market society have made direct violence against the person not only superfluous but economically counterproductive. Heide Gerstenberger's *Market and Violence* does not contest the thesis that there has been in many places a decline in the use of violence in the pursuit of profit, but it demolishes the assumption that this can be put down to the evolution of economic rationality. By means of a deep engagement with the concrete historical reality of capitalist economies, Gerstenberger establishes that wherever capitalism has been tamed, this has been achieved only by a combination of energetic social contestation and political intervention. First published in German in 2018, the present English language edition makes a sweeping history of capitalist violence by one of the preeminent theorists of capitalist society working today available to a wider readership.

Women and the Military Ruth Margolies Beitler, Sarah M. Gerstein, 2021-04-07 This addition to the *Women and Society around the World* series explores the roles, challenges and accomplishments of women in the military in countries across the globe. Around the world, millions of men serve in their countries' militaries, be it on land, on the seas or in the air. But while many militaries have opened all positions to women, even those on the front lines, others remain closed. Countries have cited a number of reasons for their policies, including changing views of women and the military, conscription and economic and demographic trends. Written by a professor of comparative politics at the United States Military Academy at West Point and an active-duty army major, this book seeks to provide an understanding of women's roles in militaries around the world. The book is organized by region, exploring societal and

cultural views of masculinity and war as well as factors influencing changing views of women and the military including conscription and economic and demographic trends Topics also include sexual harassment recruitment and views on women's physicality and strength High school students undergraduates and general readers will find this cross cultural study a fascinating and important resource
