Concrete Structures Subjected to Impact and Blast Loadings and Their Combinations

Chunwei Zhang,Gholamreza Gholipour,2022-05-08 Although much research focuses on investigating the responses of reinforced concrete RC structures under sole impact or blast loads the responses of RC structures under a combination of impact and blast loads currently represent a gap in our knowledge The combined actions of impact and blast loadings may be applied to RC structures during accidental or intentional collision of vessels vehicles etc carrying explosive materials A comprehensive study on the vulnerability of various structural members is carried out using finite element FE simulations under combination of impact and blast loads with the variations of various loading and structural related parameters and key parameters This book introduces various structural analysis approaches for concrete structures when subjected to extreme loads such as impact and blast loadings The theory of the combinations of impact and blast loads is proposed that can provide primary insights to the specific readers to develop new ideas in impact and blast engineering including combined actions of extreme loads arising from real world intentional or accidental events This book will be of value to students undergraduate or postgraduate engineers and researchers in structural and civil engineering and specifically those who are studying and investigating the performances of concrete structures under extreme loads
