Duke, 2008-10-24 Finalist for 2009 The Council on Botanical Horticultural Libraries Literature Award A Comprehensive Guide Addressing Safety Efficacy and Suitability About a quarter of all the medicines we use come from rainforest plants and more than 1 400 varieties of tropical plants are being investigated as potential cures for cancer Curare comes from Nature's Pharmacopeia Dan Choffnes, 2016-08-09 This beautifully illustrated elegantly written textbook pairs the best research on the biochemical properties and physiological effects of medicinal plants with a fascinating history of their use throughout human civilization revealing the influence of nature s pharmacopeia on art war conquest and law By chronicling the ways in which humans have cultivated plant species extracted their active chemical ingredients and investigated their effects on the body over time Nature s Pharmacopeia also builds an unparalleled portrait of these special herbs as they transitioned from wild flora and botanical curiosities to commodities and potent drugs The book opens with an overview of the use of medicinal plants in the traditional practices and indigenous belief systems of people in the Americas Africa Asia and ancient Europe It then connects medicinal plants to the growth of scientific medicine in the West Subsequent chapters cover the regulation of drugs the use of powerful plant chemicals such as cocaine nicotine and caffeine in various medical settings and the application of biomedicine s intellectual frameworks to the manufacture of novel drugs from ancient treatments Geared toward nonspecialists this text fosters a deep appreciation of the complex chemistry and cultural resonance of herbal medicine while suggesting how we may further tap the vast repositories of the world s herbal knowledge to create new pharmaceuticals Laurie Pippen's All Natural Antibacterial Agents Laurie Pippen, 2015-05-24 The classification antibacterial includes anything that destroys bacteria or inhibits the ability of bacteria to grow and reproduce Herbals approach bacterial infection from two directions They stimulate the immune system to produce more immune cells aiding your body s ability to fight the infection and they act in direct opposition to bacteria by inhibiting their ability to grow and reproduce so they cannot survive The first line of defense against bacterial infection is prevention Disinfecting surfaces with known antibacterial cleaners maintaining good health through diet rest and exercise and minimizing exposure to infectious agents is far more effective than any treatment plan in the continued battle against bacteria Regardless of the preventative care you take there are always times where treating an infection will be necessary Traditionally bacterial infection is fought by blending herbals that support the body s own natural

defenses with those that act to inhibit and kill the bacteria Using a combination that blends both actions helps to minimize the duration and severity of any infection Many herbs and oils act as natural immunostimulant and antibacterial agents Some of these natural products work as well as or even better than the products sold in your local pharmacy Some of the items in your local pharmacy are even created based on the chemical constituents of plants you might have growing in your own yard This guide contains antibacterial agents that act as both disinfectants for infected air and surfaces and disease fighting agents for the body Both categories eliminate harmful bacteria It is important that you read the traditional uses and side effects of each plant and discuss any alternative treatment with a qualified herbalist or physician prior to choosing a natural product
