study suggestions to delve deeper into sports training an extremely vast and constantly updated subject It is not an article that contains instructions for performing a kick a block a jump it is a text that introduces the principles of training planning and organization of sports work on the tatami and aims to allow an initial rationalization and an initial in depth analysis of the aspects linked to the performance of taekwondo All the arguments relating to the work on the tatami are the result of my ruminations while everything else can be found in the texts indicated in the bibliography I could have reported all the studies relating to the arguments proposed but it didn t seem useful to me since the manuals proposed in the bibliography collect them all and argue them as appropriate presenting everything that is needed in an understandable and easy to consult manner unlike the papers scientific ones that need a bit of a handle
