Passive and Active Measurement Arvind Krishnamurthy, Bernhard Plattner, 2010-06-17 The 2010 edition of the Passive and Active Measurement Conference was the 11th of a series of successful events. Since 2000 the Passive and Active Measurement (PAM) conference has provided a forum for presenting and discussing innovative and early work in the area of Internet measurements. PAM has a tradition of being a workshop like conference with lively discussion and active participation from all attendees. This event focuses on research and practical applications of network measurement and analysis techniques. This year's conference was held at ETH Zurich, Switzerland. PAM 2010 attracted 79 submissions. Each paper was carefully reviewed by at least three members of the Technical Program Committee. The reviewing process led to the acceptance of 23 papers.

The papers were arranged in nine sessions covering the following areas: routing, transport protocols, mobile devices, topology, measurement, infrastructure, characterizing network usage, analysis techniques, traffic analysis, and the Web. We are very grateful to Endace Ltd, New Zealand; Cisco Systems Inc, USA; armasuisse, Switzerland; and the COST Action TMA whose sponsoring allowed us to keep registration costs low and to offer several travel grants to PhD students. We are also grateful to ETH Zurich for sponsoring PAM as a host.

Pervasive Computing Patrik Floréen, Antonio Krüger, Mirjana Spasojevic, 2010-05-06. Welcome to the proceedings of the 8 International Conference on Pervasive Computing, Pervasive 2010, After Toronto, Sydney, and Nara. The conference has now returned to Europe. Pervasive is one of the most important conferences in the area of pervasive and ubiquitous computing. As in the previous year, we had two categories of technical papers: Full Papers and Notes. Pervasive attracted 157 valid submissions from which the Technical Program Committee (TPC) accepted 24 full papers and one note, resulting in an overall acceptance rate of 16%. The submissions included 628 authors from 27 countries representing all the continents except Antarctica. As we can see from these figures, Pervasive is a truly global, highly competitive conference. A major conference such as Pervasive requires a rigorous and objective process for selecting papers. This starts with the selection of a high quality TPC. We were fortunate to be able to draw on the wisdom and experience of our 28 TPC members from the most prestigious universities and research labs in Europe, North America, and Asia. This committee was aided by the input of no less than 238 external reviewers chosen on the basis of their domain knowledge and relevance to pervasive computing. The papers were selected using a double-blind review with four peer reviews per paper, a discussion phase among the reviewers, and a discussion of the papers in the TPC meeting which was held in Palo Alto during December 12-13, 2009. We thank Nokia Research Center for hosting the meeting.
