Heinecken,2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994 In South Africa's changed political state how has civilian control of the military been implemented and what does this mean for defence in a democracy This book presents an overview of the security environment how the mission focus of the military has changed and the implications for force procurement force preparation force employment and force sustainability The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force the effect of affirmative action on meritocracy recruitment and retention military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment gender equality and mainstreaming the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged HIV AIDS and the consequences this holds for the military in terms of its operational effectiveness In closing the author highlights key events that have caused the SANDF to become lost in transition and transformation spelling out some lessons learned The conclusions she draws are pertinent for the future of defence security and civil military relations of countries around the world **Reducing Dietary Sodium and Improving Human Health** Jacqui Webster,2018-05-18 This book is a printed edition of the Special Issue Reducing Dietary Sodium and Improving Human Health that was published in *Nutrients* *Discriminating Taste* S. Margot Finn,2017-04-24 For the past four decades increasing numbers of Americans have started paying greater attention to the food they eat buying organic vegetables drinking fine wines and seeking out exotic cuisines Yet they are often equally passionate about the items they refuse to eat processed foods generic brands high carb meals While they may care deeply about issues like nutrition and sustainable agriculture these discriminating diners also seek to differentiate themselves from the unrefined eater the common person who lives on junk food *Discriminating Taste* argues that the rise of gourmet ethnic diet and organic foods must be understood in tandem with the ever widening income inequality gap Offering an illuminating historical perspective on our current food trends S Margot Finn draws numerous parallels with the Gilded Age of the late nineteenth century an era infamous for its class divisions when gourmet dinners international cuisines slimming diets and pure foods first became fads Examining a diverse set of cultural touchstones ranging from *Ratatouille* to *The Biggest Loser* Finn identifies the key ways that good food has become conflated with high status She also considers how these taste hierarchies serve as a distraction leading middle class professionals to focus on small acts of glamorous and virtuous consumption while ignoring their class's larger economic stagnation A provocative look at the ideology of contemporary food culture *Discriminating Taste* teaches us to question the maxim that you are what you eat *Proceedings of the Malang International Conference in Medical and*
