Musique Et Sciences De Lesprit Actes De Colloque:

A Sacerdotal Poetics Kathryn Wills, 2023-03-06 This book offers a new way of understanding the old conflict between iconophiles and iconoclasts by exploring the way images in poetry are used by one poet W B Yeats and his translator Yves Bonnefoy Using the phenomenology of Jean Luc Marion as a tool of interpretation the book suggests further that translation is a significant act in which one entire theological world of a Protestant poet may become a completely different Catholic one when the translation is performed by a culturally Catholic poet For Bonnefoy therefore the act of translation becomes a profound act of hope L'Esprit Créateur ,1987 **Simultaneity and Delay** Jay Lampert, 2012-02-09 Through original speculations on the surprisingly complementary concepts of simultaneity and delay and new interpretations of the great philosophers of time this book proposes an innovative theory of staggered time In the early 20th Century Bergson and Husserl following Einstein made Simultaneity what it means for events to occur at the same time a central motif in philosophy In the late 20th Century Derrida and Deleuze instead emphasized Delay events staggered over distant times This struggle between convergent and staggered time also plays out in 20th Century aesthetics especially music politics and the sciences Despite their importance in the history of philosophy this is the first book to comprehensively examine the concepts of simultaneity and delay By putting simultaneity and delay into a dialectical relation this book argues that time in general is organized by elastic rhythms Lampert s concepts describe the time structures of such diverse phenomena as atonal music political decision making neuronal delays leaps of memory and the boredom of waiting and simultaneities and delays in everyday experience and behaviour **Records of the General Conference of the United Nations Educational, Scientific and Cultural Organization** Unesco. Suprahumanism Daniel S. Forrest, 2014-08-09 We are at a crucial point in time a moment of transition as important as the emergence of Homo sapiens or the beginning of civilisation after the Neolithic Revolution Paradoxically the triumph of the West also called globalisation means the death of Europe and European man Our destiny hangs between two options either to complete the triumph of the egalitarian conception of the world which will bring about the end of history or to promote a historical regeneration Nietzsche prophesied that the Earth will eventually belong to either the last man or to the superman There are no other alternatives **Marin Mersenne and the Study of Harmony** Leendert Miesen, 2025-10-01 Marin Mersenne and the Study of Harmony delves into the central role of music among the early modern sciences by focusing on

the work of the French polymath Marin Mersenne 1588 1648 Although now regarded more as an art than a science music was for many early modern scholars a universal science for studying the harmonies present in all beings For Mersenne music's ability to be quantified while being experienced aesthetically meant that it was the central science to approximate the sounding and inaudible harmonies present in the world and universe at large Bringing together Mersenne's interests in the physics of sound and hearing musical composition instruments curiosities and music from outside Europe this book shows why so many scholars were drawn to music and how music was at the center of the early modern debate on the foundations of knowledge **Actes de la Conférence Générale, Vingt-sixième Session: Proceedings** Unesco.
