## **Mugaritz A Natural Science Of Cooking:**

Mugaritz Andoni Luis Aduriz, 2012-04-27 Mugaritz in northern Spain has long been considered one of Spain's most influential restaurants and Aduriz one of its most talented and creative chefs. Aduriz reveals his creative process behind his dishes with 70 recipes sure to inspire chefs and food lovers around the world. *Gastrophysics* Charles Spence, 2017-06-20 The science behind a good meal: all the sounds, sights, and tastes that make us like what we're eating and want to eat more. Why do we consume 35 percent more food when eating with one other person and 75 percent more when dining with three? How do we explain the fact that people who like strong coffee drink more of it under bright lighting? And why does green ketchup just not work? The answer is gastrophysics, the new area of sensory science pioneered by Oxford professor Charles Spence. Now he's stepping out of his lab to lift the lid on the entire eating experience: how the taste, the aroma, and our overall enjoyment of food are influenced by all of our senses as well as by our mood and expectations. The pleasures of food lie mostly in the mind, not in the mouth. Get that straight and you can start to understand what really makes food enjoyable: stimulating and most important, memorable. Spence reveals in amusing detail the importance of all the off-the-plate elements of a meal: the weight of cutlery, the color of the plate, the background music, and much more. Whether we're dining alone or at a dinner party on a plane or in front of the TV, he reveals how to understand what we're tasting and influence what others experience. This is accessible science at its best, fascinating to anyone in possession of an appetite. Crammed with discoveries about our everyday sensory lives, *Gastrophysics* is a book guaranteed to make you look at your plate in a whole new way.
