Kallapur, 2016-01-07 Bronchopulmonary dysplasia BPD as a chronic lung disease affecting preterm infants has been recognized for more than 45 years However little progress has been made in the prevention and treatment of the disease BPD continues to be a major morbidity affecting preterm infants Studies in pre adolescent children demonstrate that the abnormal lung function from BPD persists well into childhood Infants with BPD also have an increased risk for adverse neurodevelopmental outcome Thus BPD imposes a significant burden of adverse health outcomes in preterm infants The major risk factors for BPD are prematurity mechanical ventilation exposure to noxious insults such as oxygen infections New research data both in basic science and clinical studies have shed light on the pathogenesis and possible new treatment or management strategies for the future In the proposed issue of the Clinics in Perinatology we would like to comprehensively cover BPD both from a basic science and clinical perspective Our attempt is to balance new information along with classic topics The proposed authors for the issue are recognized experts in the topic area s We hope that the issue will be of interest to a broad array of readership BioSensing, Theranostics, and Medical Devices Vivek Borse, Pranjal Chandra, Rohit Srivastava, 2021-12-09 This book provides up to date information on the prototypes used to develop medical devices and explains the principles of biosensing and theranostics It also discusses the development of biosensor and application orientated design of medical devices In addition to summarizing the clinical validation of the developed techniques and devices and the regulatory steps involved in their commercialization the book highlights the latest research and translational technologies toward the development of point of care devices in the health care Lastly it explores the current opportunities challenges and provides troubleshooting on the use of biosensors in precision medicine The book is helpful for researchers and medical professionals working in the field of clinical theranostics and medical device development wanting to gain a better understanding into the principles and processes involved in the development of biosensors *American Journal of*

Respiratory and Critical Care Medicine ,2004 **Emerging Topics and Controversies in Neonatology** Elaine M. Boyle,Jonathan Cusack,2020-02-05 This textbook addresses the themes that are at the forefront of neonatal clinical care and research based on natural divisions in care during pregnancy and postnatally by gestational age at birth The book offers a unique approach in that it proposes discussion of important general principles underpinning neonatal care that are not addressed in most general neonatology textbooks such as ethical issues counselling effective training methods quality and safety among other subjects These are fundamental aspects and challenges that need to be appreciated by senior clinicians A chapter authored by parents describing their perspectives of neonatal intensive care is unique and will be highly educational with the potential to influence the way in which individuals view and deliver neonatal care The authors discuss common and important conditions to promote adoption of sound evidenced based practice where this is available However where evidence is limited as is the case in many areas of neonatal practice the authors aim to encourage critical thinking and evidence appraisal which are necessary skills for busy clinicians wishing to filter evidence to guide delivery of care This text is suitable for senior trainees wishing to pursue a career in neonatal medicine early career neonatologists and paediatricians with an interest in neonatology It is also of interest to established neonatologists wishing to update their neonatal knowledge The content is based on the RCPCH Level 3 curriculum and addresses important topical and or controversial aspects of neonatal care Monitoring in Anesthesia and Perioperative Care David L. Reich,2011-08-08 Monitoring in Anesthesia and Perioperative Care is a practical and comprehensive resource documenting the current art and science of perioperative patient monitoring addressing the systems based practice issues that drive the highly regulated health care industry of the early twenty first century Initial chapters cover the history medicolegal implications validity of measurement and education issues relating to monitoring The core of the book addresses the many monitoring modalities with the majority of the chapters organized in a systematic fashion to describe technical concepts parameters monitored evidence of utility complications credentialing and monitoring standards and practice guidelines Describing each device technique and principle of clinical monitoring in an accessible style Monitoring in Anesthesia and Perioperative Care is full of invaluable advice from the leading experts in the field making it an essential tool for every anesthesiologist Respiratory Care ,2002
Australian Official Journal of Patents ,2001
