ECMLG2013-Proceedings For the 9th European Conference on Management Leadership and Governance Maria Th Semmelrock-Picej, Aleš Novak, 2013-01-09 Lean Management System LMS:2012 William A. Levinson,2017-07-27 The success of a Lean manufacturing program depends far more on organization wide leverage of Lean manufacturing tools than it does on the tools themselves To this the organization must add the human relations aspects that earn buy in and engagement by all members of the workforce to the extent that workers will react immediately and decisively to the presence of waste The synergy of the human and technological aspects of Lean form what Henry Ford called a universal code for the achievement of world class results in any enterprise and which he put into practice to deliver unprecedented bottom line results This book expands upon and systemizes this universal code into a structure or framework that promotes organizational self audits and continuous improvement The book s first section offers a foundation of four simple but comprehensive Lean key performance indicators KPIs waste of the time of things as in cycle time waste of the time of people waste of energy and waste of materials The Toyota Production System's seven wastes are all measurable in terms of these four KPIs which also cover the key metrics of Eliyahu Goldratt's theory of constraints throughput inventory and operating expense The first section then adds a proactive improvement cycle that sets out to look for trouble by isolating processes for analytical purposes and measuring and then balancing inputs and outputs to force all wastes to become visible It is in fact technically impossible for any waste of material or energy to hide from what chemical engineers call a material and energy

balance Application of this book s content should therefore satisfy most provisions of the ISO 14001 environmental management system standard and the new ISO 50001 energy management system standard The second section consists of an unofficial and therefore customizable standard against which the organization **Proceedings of the 2nd** International Conference on Democracy and Social Transformation (ICON-DEMOST 2023) Naili Ni'matul Illiyyun, Endang Supriadi, Ririh Megah Safitri, Masrohatun Masrohatun, 2024-01-05 This is an open access book Faculty of Social and Political Science State Islamic University Walisongo Semarang has been playing significant roles in building global peace and justice by conducting scientific research and creating a space for academic dialogue and discussion This goal is in line with our vision to be a Research Faculty based on the unity of sciences for humanity and civilization As part of the efforts to create a space for academic dialogue at a global level we organize an international conference which aims to develop scientific knowledge build institutional capacity and strengthen international networking The conference is also held to support State Islamic University Walisongo Semarang in achieving its vision to be an Islamic world class university The conference raises the issue of democracy and social transformation to capture the social and political dynamics The selection of this topic is based on the idea that technological development becoming a crucial issue within modern society in which people tend to experience alienation within the rapid social and political transformation Democracy as a political system that ensures transparency citizen participation and human rights protection is now under threat Having the fact that there is a growing tendency of using transactional politics to win political interests such as the use of money and identity in political processes therefore political analysts consider this situation as the regression of democracy Rapid social and cultural transformation as a consequence of advanced technology creates problems in modern society On one hand technology has made the life of people easier However on the other hand the sense of humanity s values and principles is declining This situation can be observed in the decrease in social solidarity and the rise of individualism Modernity that values productivity and economic growth has brought an equive impact on the life of human being and nature The exploitative character of industrialization has created an ecological crisis Advanced information technology has loosened social cohesivity and the rise of instrumental rationality has removed local genius or local wisdom from the life of society Since the ultimate goal of humanity is respecting the dignity of human beings hence bringing back humanity to the center of the development program is crucial especially in the current social and political dynamics In the political context humanity means respecting the basic rights of the citizen and putting them as a subject of political development and not perceiving citizens as only an instrument to win political power Based on the above background this conference is organized The overall goal of the conference is to mainstream humanity in the current social and political change The conference is also expected to be an arena for scholars and experts in social and political science as well as practitioners and policymakers to meet and exchange ideas and perspectives for a better future of our society Standards for Management Systems Herfried Kohl, 2020-02-19 This book
