### Gross Anatomy and Basic Function of the Endocrine Glands

- Both the endocrine and nervous systems are major regulating systems of the body; however, the nervous system has been compared to a text message, and the endocrine system to mailing a letter. Briefly explain this comparison.

Nervous system controls homeostasis through nerve impulses, it generates  
transmit electrical impulses less than a second in order for muscle, tissue, gland  
to contract. Endocrine system takes time to release hormones into bloodstream and reaches  
the destination.

- Define hormone. Hormones are chemical substances that regulate  
the internal environment, metabolism, energy balance & production.
- Chemically, hormones belong chiefly to two molecular groups, the water-soluble hormones  
and the steroid & lipid soluble hormones.
- Define target cell. A cell that has receptors to recognize/respond  
to a given hormone
- If hormones travel in the bloodstream, why don't all tissues respond to all hormones? because hormones can  
only bind with specific receptors of the target cell
- Identify the endocrine organ described by each of the following statements.

- |                      |   |
|----------------------|---|
| <u>Thyroid gland</u> | 1. located in the anterior neck; produces key hormones for metabolism                         |
| <u>Hypothalamus</u>  | 2. produces the hormones that are stored in the posterior pituitary                           |
| <u>Pancreas</u>      | 3. a mixed gland, located behind the stomach and close to the small intestine                 |
| <u>Testes</u>        | 4. paired glands suspended in the scrotum   |
| <u>Pituitary</u>     | 5. bilobed gland located in the sella turcica   |
| <u>Ovaries</u>       | 6. found in the pelvic cavity of the female, concerned with ova and female hormone production |
| <u>Thyroid</u>       | 7. found in the upper thorax overlying the heart; large during youth                          |
| <u>Pineal</u>        | 8. found in the roof of the third ventricle of the brain                                      |
