

## WRITING A LAB REPORT

BY 123 and 124 are offered to biology majors and others in pre-health professional curricula. One of the goals toward which you will work in the introductory biology series is developing the ability to write a formal lab report in the style of a scientific paper. Students in these courses who intend to become scientists should be able to report to other scientists the results of scientific research.

You may wish to look in the library at scientific journals such as *The Journal of Herpetology*, or other publications intended to convey information from one research scientist to another. The library has online holdings of many journals available through the library's local catalog. In the introductory biology courses, your research will not be original or publishable, but will be presented in a style that parallels a scientific publication. You will use a general format in which each section is labeled and includes information particular to that section.

A formal lab report includes the following sections: Title, Introduction, Materials and Methods, Results, Discussion, Conclusions, and References. BY 123/124 students have the option of doing a rough draft. Due date for this will be announced by your lab TA. Seek help if needed. The lab coordinator will be unable to assist students who are not theirs.

**Rough Drafts are to give general advice; they are not a proofreading service that will find errors (content or format). No guarantee is given that one who does a rough draft will get 100% on this assignment.**

**Lab reports (as well as rough drafts, if applicable) must be typed and double-spaced (12-point Times or Arial font, 1-inch margins)! No handwritten reports/drafts will be accepted. Reports are to be individual, original effort. Plagiarized or partially plagiarized reports will receive a grade of 0.**

Be aware of correct spelling, grammar, syntax, etc. Syntax is the art of creating grammatically correct sentences that convey your idea to your audience. Take, for example, the title "Isolation of Antigens from Monkeys Using Complement Fixation Techniques." Those must be some pretty smart monkeys! Another example, which sounds rather painful, is "After standing in boiling water for an hour, examine the flask." These types of mistakes should not be made by college students. **Points can and will be deducted for incorrect spelling and bad grammar.** Help with grammar can be obtained from the English Department's Writing Lab. This service is free of charge to UAB students.
