Undertaking Educational Challenges in the 21st Century Cynthia S Sunal, Kagendo Mutua, 2008-10-01 This is Book V in the series Research on Education in Africa the Caribbean and the Middle East The series strives to encourage the presentation of evidence based investigations using data collected on site from the three world regions it considers A strong focus is on data specific to a nation or to a region within a nation as we recognize that nations are diverse often encompassing regions with unique cultural and geographic characteristics The data are rooted in the voices of individuals and communities Such evidential data are analyzed and interpreted within the context of the complex human and natural environments from which they are derived Chapters in the books within the series describe investigations that

are part of an effort to continue the publication of an annual compilation of research studies in the three world regions upon which the series focuses. The series therefore indicates that the need to develop modern self-sufficient independent and post-colonial societies is being balanced with the need to strengthen cultural values and identities within these three world regions. Book V in the series focuses on how the educational challenges found in these three world regions are addressed. The chapters specifically examine related recent research, identify useful investigative methodologies, identify accomplishments in meeting challenges, and consider unresolved challenges. The overarching questions presented below were derived from an analysis of the questions, methods, and conclusions presented in the studies appearing in this book. These overarching questions described here reflect the connections between educational issues that emerged in the 20th century and issues identified in the 21st century.

Handbook of European Societies Stefan Immerfall, Göran Therborn, 2009-12-01. European integration is one of the most ambitious and socially far-reaching developments in world politics and in world economics. Against growing opposition and despite increasing social heterogeneity, the European Union continues to expand and to acquire new competences. But to what extent is the self-proclaimed ever closer union among the peoples of Europe a social reality? In which ways is the political European project anchored in social developments? How does social change impinge upon political integration? Societal trends in multi-cultural, multi-ethnic, multi-lingual, and socially diverse Europe have never been studied systematically. *Handbook of European Societies: Social Transformations in the 21st Century* sets to rectify this neglect of societal developments in Europe, providing a groundwork for the sociology of European integration. The book portrays social life and social relations in the enlarged Europe and gives a perspective on the European Union as an evolving social entity. *Handbook of European Societies* is a pioneering source book analyzing the current social patterns on the continent. It covers a representative selection of major topics of social concern and sociological relevance, such as Collective Action, Consumption, Identity, Power, Structure, Sexuality, Stratification, and Well-being. Each contribution probes key developments in a strictly comparative manner. The Handbook thus offers a detailed look into the intricacies of the national societies of Europe and into the prospect of an emerging European society. The Editors have enlisted leading researchers to synthesize existing knowledge and to make use of many different data sources in a straightforward style. The contributions stay away from jargon, simple labeling, and sweeping assertions. Instead, they provide solid and accessible information on a wide variety of social trends and processes within and across European societies.
