

BIOLOGY LAB REPORT FORMAT

Biology labs must be either typed or written in blue or black pen.
If written in pen, write only on one side of the paper.

FORMAT: The lab report should be divided into clearly labeled sections as defined below. The headings must be included. The sections should be formatted as they are on this sheet. Pages should be numbered according to the following format: Page 1 is the first page of the lab (not including the title page) and is numbered in the bottom center of the page; all additional pages should be labeled at the top center of each page. Neatness is important, so remember to leave spaces between sections. Format is included in the grade for each lab report.

TITLE PAGE: The title of the lab, your name and period. This page is NOT numbered.

I. AIM:

- * For every lab experiment, you must give an aim.
 - The aim should state the purpose of the experiment.
 - It may be written in the form of a question and shows what you hope to learn from the experiment.
- * Some labs require you to write a hypothesis statement ("if, and, and then" format).
 - A hypothesis is a relationship between two variables (independent and dependent variables).
 - It must be testable.
 - A hypothesis is not a guess and should be based on prior knowledge.
 - Also identify other variables that you need to keep constant.

II. Procedure: Your procedure section should be written in such a way that a layman could correctly complete the lab using your list of materials and numbered procedure.

- * **Materials** - All materials used to complete the laboratory should be listed in columns.
- * **Procedure** -
 - Steps of the procedure should be numbered and listed.
 - Steps should be written in complete sentences with a noun and a verb.
 - Never use personal pronouns in the laboratory report.
 - The procedures should be realistic and control for variables.

III. Results: Present your results in an organized way.

- Give the results you found, not what you think you should have found!
- Drawings should follow the format given and colored pencils are encouraged. If you use drawings from the internet you need to correctly site the source.

The Impact of Rubric Use and Lab Report Performance in Biology Students Tori Allison Hellmann, 2012 The research topic chosen is related to the use of rubrics and how using a rubric for scoring lab reports might impact student performance on lab reports I also wanted to see if rubric use could improve their knowledge of science content as well I chose this as my topic because for the past 12 years as a science teacher I have noticed inadequacies in student performance on lab reports The students seem to enjoy the lab experiments but when it comes to the lab report there are some obvious deficiencies in lab report writing skills I have also noticed that students do not seem to make connections between the labs and the science content
