PRINCIPLES RELATING TO THE MARKING OF LIFE SCIENCES

- 1. If more information than marks allocated is given**
Stop marking when maximum number of marks is reached and place a wavy line and 'max' in the right-hand margin.
- 2. If, for example, three reasons are required and five are given** Mark only the first three irrespective of whether all or some are correct/incorrect.
- 3. If whole process is given when only part of it is required**
Read all and credit relevant part.
- 4. If comparisons are asked for and descriptions are given**
Accept if differences / similarities are clear.
- 5. If tabulation is required but paragraphs are given**
Candidates will lose marks for not tabulating.
- 6. If diagrams are given with annotations when descriptions are required**
Candidates will lose marks.
- 7. If flow charts are given instead of descriptions**
Candidates will lose marks.

The Instruction Myth John Tagg, 2019-04-05 Higher education is broken and we haven't been able to fix it. Even in the face of great and growing dysfunction it seems resistant to fundamental change. At this point can anything be done to save it? The Instruction Myth argues that yes, higher education can be reformed and reinvigorated but it will not be an easy process. In fact it will require universities to abandon their central operating principle, the belief that education revolves around instruction easily measurable in course syllabi, credits and enrollments. Acclaimed education scholar John Tagg presents a powerful case that instruction alone is worthless and that universities should instead be centered upon student learning which is far harder to quantify and standardize. Yet as he shows, decades of research have indicated how to best promote student learning but few universities have systematically implemented these suggestions. This book demonstrates why higher education must undergo radical change if it hopes to survive. More importantly it offers specific policy suggestions for how universities can break their harmful dependence on the instruction myth. In this extensively researched book Tagg offers a compelling diagnosis of what's ailing American higher education and a prescription for how it might still heal itself.

Metagaming Stephanie Boluk, Patrick LeMieux, 2017-04-04 The greatest trick the videogame industry ever pulled was convincing the world that videogames were games rather than a medium for making metagames. Elegantly defined as games about games, metagames implicate a diverse range of practices that stray outside the boundaries and bend the rules from technical glitches and forbidden strategies to Renaissance painting, algorithmic trading, professional sports and the War on Terror. In *Metagaming* Stephanie Boluk and Patrick LeMieux demonstrate how games always extend beyond the screen and how modders, mappers, streamers, spectators, analysts and artists are changing the way we play. *Metagaming* uncovers these alternative histories of play by exploring the strange experiences and unexpected effects that emerge in and around and through videogames. Players puzzle through the problems of perspectival rendering in *Portal*, perform clandestine acts of electronic espionage in *EVE Online*, compete and commentate in Korean *StarCraft* and speedrun *The Legend of Zelda* in record times with or without the use of vision. Companies like Valve attempt to capture the metagame through international esports and online marketplaces while the corporate history of *Super Mario Bros* is undermined by the endless levels of *Infinite Mario*, the frustrating pranks of *Asshole Mario* and even *Super Mario Clouds*, a ROM hack exhibited at the Whitney Museum of American Art. One of the only books to include original software alongside each chapter, *Metagaming* transforms videogames from packaged products into instruments, equipment, tools and toys for intervening in the sensory and political economies of everyday life. And although videogames conflate the creativity, criticality and craft of play with the act of consumption, we don't simply play videogames, we make metagames.

Nostalgia after Apartheid Amber R. Reed, 2020-11-30 In this engaging book Amber Reed provides a new perspective on South Africa's democracy by exploring Black residents' nostalgia for life during apartheid.

in the rural Eastern Cape Reed looks at a surprising phenomenon encountered in the post apartheid nation despite the Department of Education mandating curricula meant to teach values of civic responsibility and liberal democracy those who are actually responsible for teaching this material and the students taking it often resist what they see as the imposition of white values These teachers and students do not see South African democracy as a type of freedom but rather as destructive of their own African culture whereas apartheid at least ostensibly allowed for cultural expression in the former rural homelands In the Eastern Cape Reed observes resistance to democracy occurs alongside nostalgia for apartheid among the very citizens who were most disenfranchised by the late racist authoritarian regime Examining a rural town in the former Transkei homeland and the urban offices of the Sonke Gender Justice Network in Cape Town Reed argues that nostalgic memories of a time when African culture was not under attack combined with the socioeconomic failures of the post apartheid state set the stage for the current political ambivalence in South Africa Beyond simply being a case study however Nostalgia after Apartheid shows how in a global context in which nationalism and authoritarianism continue to rise the threat posed to democracy in South Africa has far wider implications for thinking about enactments of democracy Nostalgia after Apartheid offers a unique approach to understanding how the attempted post apartheid reforms have failed rural Black South Africans and how this failure has led to a nostalgia for the very conditions that once oppressed them It will interest scholars of African studies postcolonial studies anthropology and education as well as general readers interested in South African history and politics
