Decoding Digital Culture with Science Fiction Alan N. Shapiro, 2024-06-04 How do digital media technologies affect society and our lives Through the cultural theory hypotheses of hyper modernism hyperreality and posthumanism Alan N Shapiro investigates the social impact of Virtual Augmented Reality AI social media platforms robots and the Brain Computer Interface His examination of concepts of Jean Baudrillard and Katherine Hayles as well as films such as Blade Runner 2049 Ghost in the Shell Ex Machina and the TV series Black Mirror suggests that the boundary between science fiction narratives and the real world has become indistinct Science fictional thinking should be advanced as a principal mode of knowledge for grasping the world and digitalization

The Science Fiction Film in Contemporary Hollywood Evdokia Stefanopoulou, 2023-07-27 The Science Fiction Film in Contemporary Hollywood focuses on the American science fiction SF film during the period 2001 2020 in order to provide a theoretical mapping of the genre in the context of Conglomerate Hollywood Using a social semiotics approach in a systematic corpus of films the book argues that the SF film can be delineated by two semiotic squares the first one centering on the genre s more than human ontologies SF bodies and the second one focusing on its imaginative worlds SF worlds Based on this theoretical framework the book examines the genre in

six cycles which are placed in their historical context and are analyzed in relation to cultural discourses such as technological embodiment race animal human relations environmentalism global capitalism and the techno scientific Empire By considering these cycles which include superhero films creature films space operas among others as expressions of the genre's basic oppositions the book facilitates the comparison and juxtaposition of films that have rarely been discussed in tandem offering a new perspective on the multiple articulations of the SF film in the new millennium *From Film Adaptation to Post-Celluloid Adaptation* Costas Constandinides, 2010-10-21 The main corpus of film adaptation thus far has focused on films based on canonical literature *From Film Adaptation to Post Celluloid Adaptation* takes the next logical step by discussing the emerging modes of film adaptation from older media to new mainly focusing on the computer generated reconstructions of popular narratives and characters along with other forms of convergence such as the Internet While New Media is a broad concept the book will concentrate on the ways digital technology is being used in the encoding of films and discuss the ways this shift can be debated from a theoretical perspective Though the discussion is framed through the new media lens the work will not exclude a broader understanding of New Media which refers to video games official websites and interactivity so as to examine how the visual style of contemporary films is dispersed across and influenced by other media Discussing films like *Minority Report* *King Kong* *300* and *Wanted* in relation to Film Adaptation theory the work aims to challenge and rework the definition of adaptation
