**Magnetic Material for Motor Drive Systems** Keisuke Fujisaki, 2019-11-29 This book focuses on how to use magnetic material usefully for electrical motor drive system especially electrical vehicles and power electronics The contents have been selected in such a way that engineers in other fields might find some of the ideas difficult to grasp but they can easily acquire a general or basic understanding of related concepts if they acquire even a rudimentary understanding of the selected contents The cutting edge technologies of magnetism are also explained From the fundamental theory of magnetism to material equipment and applications readers can understand the underlying concepts Therefore a new electric vehicle from the point of view of magnetic materials or a new magnetic material from the point of a view of electric vehicles can be envisioned that is magnetic material for motor drive systems based on fusion technology of an electromagnetic field Magnetic material alone does not make up an electric vehicle of course Other components such as mechanical structure material semiconductors fuel cells and electrically conductive material are important and they are difficult to achieve However magnetic material involves one of the most important key technologies and there are high expectations for its use in the future It will be the future standard for motor drive system researchers and of magnetic material researchers as well This book is a first step in that direction

**Combinatorial Algorithms** Kratochvíl Jan, Mirka Miller, Dalibor Fronček, 2015-06-06 This book constitutes the thoroughly refereed post workshop proceedings of the 25th International Workshop on Combinatorial Algorithms IWOCA 2014 held in Duluth MN USA in October 2014 The 32 revised full papers presented were carefully reviewed and selected from a total of 69 submissions The papers focus on topics such as Algorithms and Data Structures Combinatorial Enumeration Combinatorial Optimization Complexity Theory Structural and Computational Computational Biology Databases Security Compression and Information Retrieval Decompositions and Combinatorial Designs Discrete and Computational Geometry as well as Graph Drawing and Graph Theory IWOCA is a yearly forum for researchers in designing algorithms field to advance creativeness of intersection between mathematics and computer science This is the first time this conference is being held in U S

**HPC, Big Data, and AI Convergence Towards Exascale** Olivier Terzo, Jan Martinovič, 2022-01-13 HPC Big Data AI Convergence Towards Exascale provides an updated vision on the most advanced computing storage and interconnection technologies that are at basis of convergence among the HPC Cloud Big Data and artificial intelligence AI domains Through the presentation of the solutions devised within recently founded H2020 European projects this book provides an insight on challenges faced by integrating such technologies and in achieving performance and energy efficiency targets towards the exascale level Emphasis is given to innovative ways of provisioning and managing resources as well as monitoring their usage Industrial and scientific use cases give to the reader practical examples of the needs for a cross domain convergence All the chapters in this book pave the road to new generation of technologies support their development and in addition verify them on real world problems The readers will find this book

useful because it provides an overview of currently available technologies that fit with the concept of unified Cloud HPC Big Data AI applications and presents examples of their actual use in scientific and industrial applications *Web, Artificial Intelligence and Network Applications* Leonard Barolli, Flora Amato, Francesco Moscato, Tomoya Enokido, Makoto Takizawa, 2020-03-30 This proceedings book presents the latest research findings and theoretical and practical perspectives on innovative methods and development techniques related to the emerging areas of Web computing intelligent systems and Internet computing The Web has become an important source of information and techniques and methodologies that extract quality information are of paramount importance for many Web and Internet applications Data mining and knowledge discovery play a key role in many of today's major Web applications such as e-commerce and computer security Moreover Web services provide a new platform for enabling service-oriented systems The emergence of large-scale distributed computing paradigms such as cloud computing and mobile computing systems has opened many opportunities for collaboration services which are at the core of any information system Artificial intelligence AI is an area of computer science that builds intelligent systems and algorithms that work and react like humans AI techniques and computational intelligence are powerful tools for learning adaptation reasoning and planning and they have the potential to become enabling technologies for future intelligent networks Research in the field of intelligent systems robotics neuroscience artificial intelligence and cognitive sciences is vital for the future development and innovation of Web and Internet applications Chapter An Event Driven Multi Agent System for Scalable Traffic Optimization is available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](https://link.springer.com) *Yearbook of International Organizations 2014-2015 (Volume 3)* Union Of International Associations, Union of International Associations, 2014-08-20 The Yearbook of International Organizations provides the most extensive coverage of non-profit international organizations currently available Detailed profiles of international non-governmental and intergovernmental organizations IGO collected and documented by the Union of International Associations can be found here In addition to the history aims and activities of international organizations with their events publications and contact details the volumes of the Yearbook include networks between associations biographies of key people involved and extensive statistical data Volume 3 allows readers to locate organizations by subjects or by fields of activity and specialization and includes an index to Volumes 1 through 3 **The Semantic Web** Ruben Verborgh, Katja Hose, Heiko Paulheim, Pierre-Antoine Champin, Maria Maleshkova, Oscar Corcho, Petar Ristoski, Mehdi Alam, 2021-05-31 This book constitutes the refereed proceedings of the 18th International Semantic Web Conference ESWC 2021 held virtually in June 2021 The 41 full papers and 2 short papers presented were carefully reviewed and selected from 167 submissions The papers were submitted to three tracks the research track the resource track and the in-use track These tracks showcase research and development activities services and applications and innovative research outcomes making their way into industry The research track caters to both long-standing and emerging research topics in the form of the
