Shaping Images Thorsten Stephan Beck, 2016-09-12 Images play an outstanding role in the transfer of knowledge They are used in numerous academic disciplines to present scientific results Digital tools such as Adobe Photoshop make it possible to display the information in images brilliantly and clearly at the same time the line between appropriate and inappropriate manipulation is not always easy to draw Scientific journals have published guidelines for handling and editing images but they are not always specific enough to provide clarity for all situations Shaping Images examines how scholars from biology information science art history and design deal with this uncertainty how they process and manipulate images where they see their special potential and how they draw the line between appropriate and inappropriate image manipulation The work also looks at scientific journals and lets selected editors have their say What would have to happen to make it possible to combat image manipulation in science more effectively The book's

Political Narratives in the Middle East and North Africa Wolfgang Mühlberger,Toni Alaranta,2020-02-13 This book discusses the role of political narratives in shaping perceptions of instability and conceptions of order in the Middle East and North Africa MENA The authors illustrate how in times of socio political turmoil and outbursts of discontent such as the Arab Spring political entrepreneurs explain and justify their political agendas by complementing hard power solutions with attractive ideas and discursive constructions that appeal to domestic constituencies and geopolitical allies The book is divided into two

parts The first focuses on non state actors such as confessional communities and ideological movements who aim to develop narratives that are convincing to their respective polities It also studies regional powers that seek to determine their positions in a competitive environment via distinctive narrations of order In part two the authors investigate the narratives of global players that aim to explain and justify their role in an evolving international order *Towards Elimination of Dog Mediated Human Rabies* Salome Dürr,Anna Sophie Fahrion,Lea Knopf,Louise Taylor,2017-10-06 Rabies is an ancient zoonotic viral disease that still exerts a high impact on human and animal health The disease is almost 100% fatal after clinical signs appear and it kills tens of thousands of people per year worldwide particularly in Africa and many parts of Asia Although the disease in humans can be prevented by timely post exposure prophylaxis its access and affordability is limited in rabies endemic countries With 99% of infections in humans caused by rabid domestic dog bites controlling the infection in this reservoir population has been proven to be most effective to reduce and eliminate human rabies cases In this context this Research Topic invited contributions on the control and elimination of dog mediated human rabies Publications on epidemiological educational policy related and economic aspects of dog and human rabies surveillance implementation of control in dogs and humans and scientific documentation of success stories were consolidated We hope that these articles contribute to reaching the ambitious goal set by key players in global health of the elimination of dog mediated human rabies by 2030 **Scaled for Success** Philip Hayward,2018-07-26 Emerging from the confluence of Greco Roman mythology and regional folklore the mermaid has been an enduring motif in Western culture since the medieval period It has also been disseminated more widely initially through Western trade and colonisation and more recently through the increasing globalisation of media products and outlets Scaled for Success offers the first detailed overview of the mermaids dispersal outside Europe Complementing previous studies of the interrelationship between the mermaid and Mami Wata spirit in West Africa this volume addresses the mermaids presence in a range of Middle Eastern Asian Australian Latin American and North American contexts Individual chapters identify the manner in which the mermaid has been variously syncretised and or resignified in contexts as diverse as Indian public statuary Thai cinema and Coney Islands annual Mermaid Parade Rather than lingering as a relic of a bygone age the mermaid emerges as a versatile dynamic and above all polyvalent figure Her prominence exemplifies the manner in which contemporary media lore has extended the currency of established folkloric figures in new and often surprising ways Analysing aspects of religious symbolism visual art literature and contemporary popular culture this copiously illustrated volume profiles an intriguing and highly diverse phenomenon Philip Hayward is editor of the journal Shima and holds adjunct professor positions at the University of Technology Sydney and at Southern Cross University His previous volume Making a Splash Mermaids and Mermen in 20th and 21st Century Audiovisual Media was published by John Libbey Publishing Indiana University Press in 2017 [Current Index to Journals in Education](#) ,1997 [Dictionary Catalog of the Department Library](#) United States.
