NABH - Common Critical Non-Conformities in Indian Hospitals Akash Tiwari, 2025-07-21 The NABH 6th Edition effective January 2025 represents a pivotal update to India s hospital accreditation standards aiming to advance patient safety operational efficiency and overall healthcare quality The 6th Edition reduces total Objective Elements OEs from 651 to 639 but raises Core OEs to 105 indicating a sharper focus on essential patient safety aspects Compliance language now uses shall not should making previously recommended practices mandatory increasing hospital accountability and the regulatory weight of each requirement¹ Newly introduced standards include Promotive Preventive Health which expands hospitals focus to wellness education and disease prevention and Sustainability in Healthcare obliging hospitals to adopt eco friendly practices like robust waste management and energy conservation These new areas demand significant investment in policy making training and infrastructure presenting particular challenges since most hospitals lack existing frameworks in these domains¹ Critical updates strengthen demands for transfusion obstetric services hospital security and cybersecurity requiring alignment with Ministry of Health and international benchmarks The renaming of Hospital Infection Control to Infection Prevention Control underlines a proactive strategy against healthcare associated infections HAIs ¹ Historical NABH audits reveal that documentation errors account for about 70% of non conformities underscoring a deep ongoing compliance problem Common non conformity areas prioritized by impact and frequency include Information Management System IMS Persistent documentation lapses and digital health cybersecurity deficiencies Non compliance can compromise patient safety data privacy and organizational reputation due to legal risks or

regulatory penalties Solutions include standardized digital protocols robust EHR adoption and continuous staff training¹

Human Resource Management HRM Insufficient staff training high attrition clinician inertia and credentialing gaps limit care quality and safety Addressing this requires competency based training strong leadership support and strict credentialing processes¹

Facility Management Safety FMS Infrastructure neglect emergency unpreparedness and poor biomedical waste handling threaten patient and staff safety Regular audits mandatory drills and systematic maintenance are crucial remedies¹

Infection Prevention Control IPC Inconsistent adherence to hygiene sterilization and waste segregation fosters HAIs and antimicrobial resistance Enforced protocols and continuous training are essential for safety and quality¹

Care of Patients COP Non adherence to clinical nursing protocols and safe procedure lapses continue to risk patient well being Implementing evidence based SOPs rigorous audits and regular competency assessments is critical¹

Access Assessment and Continuity of Care AAC Workflow problems especially delayed or missing assessments and unclear transfer protocols lead to treatment delays and patient dissatisfaction Standardized forms and robust handover mechanisms can mitigate these issues¹

Patient Rights Education PRE Failures in patient education consent and feedback collection erode trust and generate compliance lapses Hospitals must ensure multilingual rights display robust informed consent grievance redressal and privacy protection¹

Structural issues such as weak quality culture resource constraints inadequate training and outdated SOPs undermine compliance initiatives NABH 6th Edition sets higher standards for patient care digital adoption and ecological responsibility Hospitals must establish robust documentation continuous training and leadership driven quality improvement as ongoing priorities to achieve and sustain accreditation¹
