Anderson, 2004-06-07 Affirmative action strikes at the heart of deeply held beliefs about employment and education about fairness and about the troubled history of race relations in America Published on the 50th anniversary of *Brown v Board of Education* this is the only book available that gives readers a balanced non polemical and lucid account of this highly contentious issue Beginning with the roots of affirmative action Anderson describes African American demands for employment in the defense industry spearheaded by A Philip Randolph's threatened March on Washington in July 1941 and the desegregation of the armed forces after World War II He investigates President Kennedy's historic 1961 executive order that introduced the term affirmative action during the early years of the civil rights movement and he examines President Johnson's attempts to gain equal opportunities for African Americans He describes President Nixon's expansion of affirmative action with the Philadelphia Plan which the Supreme Court upheld along with President Carter's introduction of set asides for minority businesses and the Bakke ruling which allowed the use of race as one factor in college admissions By the early 1980s many citizens were becoming alarmed by affirmative action and that feeling was exemplified by the Reagan administration's backlash which resulted in the demise and revision of affirmative action during the Clinton years He concludes with a look at the University of Michigan cases of 2003 the current status of the policy and its impact Throughout the author weighs each side of every issue often finding merit in

both arguments resulting in an eminently fair account of one of America's most heated debates. A colorful history that brings to life the politicians, legal minds and ordinary people who have fought for or against affirmative action.
