Excerpt from *Sewing Machinery: Being a Practical Manual of the Sewing Machine, Comprising Its History and Details of Its Construction, With Full Technical Directions for the Adjusting of Sewing Machines*. The work is intended to give a concise but accurate and readable account of the invention of sewing machines with descriptions of the chief types of stitching mechanism in use and also technical directions for the adjustment of specific types of machine. It is hoped that the latter feature of the work will meet a want long felt of a work of reference in cases of difficulties as regards inefficient operation of sewing machines. The book is divided into two sections and those in turn are arranged in chapters. The first section treats of the history and gives elementary principles upon which sewing machines work with descriptions of the machine. The second section is entirely devoted to practical instructions to users, adjusters and sellers of sewing machines.
