## Exercise 1: Java How To Program 9th Edition Exercise Solutions

The first exercise in this chapter is designed to help you understand the basic concepts of Java. It is a simple program that prints out the text "Hello, World!". This is a classic first program for many programmers. The code is as follows:

```
1 public class Hello {  
2     public static void main(String[] args) {  
3         System.out.println("Hello, World!");  
4     }  
5 }
```

The code consists of a single class named "Hello". Inside this class, there is a method named "main". This method is the entry point of the program. It calls the "println" method of the "System.out" object, which prints the text "Hello, World!" to the console.

The code is a simple example of a Java program. It demonstrates the basic syntax of the language, including the use of classes, methods, and the "main" method. It is a good starting point for learning Java.
