Artificial Intelligence for Smart Health: Learning, Simulation, and Optimization Bing Yao, Nathan Gaw, Hyo Kyung Lee, 2025-03-07 With rapid developments in medical sensing and imaging we now live in an era of data explosion in which large amounts of data are readily available and accessible in the clinical environment The fast growing biomedical and healthcare data provide unprecedented opportunities for data driven scientific knowledge discovery and clinical decision support However it is widely acknowledged that biomedical and healthcare data contain high dimensions large volumes missing values imbalanced classes heterogeneous sources multi modalities and measurement noises These inherent features pose significant barriers to the translation of data into meaningful clinical actions Thus there arises an urgent and compelling need for the development of innovative machine learning simulation and optimization algorithms to cope with the unique challenges associated with biomedical and healthcare data facilitating the transformation of data into actionable insights for smart health Our Research Topic aims at catalyzing synergies among biomedical informatics machine learning computer simulation operations research systems engineering and other related fields with three specific goals 1 develop cutting edge data driven models to accelerate scientific knowledge discovery in biomedicine from medical and healthcare data collected from laboratory systems imaging systems and medical and sensing devices 2 develop advanced simulation and calibration algorithms to build personalized digital twins by effectively assimilating patient specific medical data with population level computer models facilitating precision medical planning 3 develop innovative optimization algorithms for optimal medical decision making in the face of uncertainty factors conflicting objectives and complex trade offs This Research Topic will offer a timely collection of information to benefit the researchers and practitioners working in the broad fields of biomedical informatics healthcare data analytics medical image processing and health related artificial intelligence By harnessing the potential of machine learning computational simulation and mathematical optimization techniques healthcare professionals can effectively analyze and interpret the vast amount of biomedical data available to them which will ultimately lead to more accurate disease diagnosis personalized treatment plans and improved patient outcomes *A Draft Handbook for*

Cross-cultural and Community Involvement Training, 1969 **Gender and Sexual Identities in Transition** Patricia Bou, José Santaemilia, 2009-05-05 The aim of this volume is to offer an international panorama of gendered and sexualised experiences with new and original data collected from a variety of cultural settings and sociopolitical contexts We look at many parts of the world Japan Sweden Poland Cyprus Spain US Australia Canada Hungary with different assumptions and expectations often revealing various research practices and traditions Gendered or sexualized discourses are unstable constructions in permanent transition in a perpetual struggle to gain social legitimacy and to counter the workings of opposite discourses They constitute privileged vantage points from which one can observe and judge power relationships New identities are created and reproduced refused and challenged This volume explores among other issues the

perpetuation of hegemonic masculinity in Evangelical universities the pharmaceutical industry's promotion of biometaphors involving a shopping strategy which revolves around compulsory heterosexuality the perpetuation of Greek Cypriot men's sexual superiority over women the Catholic Church's attempt to impose a restrictive view of religion and of sexual ethics the consolidation of American TV shopping channels as a setting where middle class femininity and consumption are linked stereotypically the negotiation of gender and sex related norms in groups of British Bangladeshi girls Even heterosexuality as the unmarked form of sexual identity and the primary site for the reproduction of gender difference needs to reassert its normative and prescriptive status maybe through the silent workings of tradition By suggesting the concept of transition we resist seeing the idea of identity as a fixed and definitive category Gender and sexual identities are never at rest One is never finished developing into a woman or a man or any other gender sexual identity Contributors include Joan Pujolar Andrea Simon Maeda Allyson Jule Stina Ericsson Agnieszka Kie kiewicz Janowiak Joanna Pawelczyk N ra Schleicher Elli Doukanari Pilar Garc s Conejos Lidia Tanaka Jos Santaemilia and Pia Pichler
