range of devices that can be used to access them in operator strategies etc Even the technology has improved considerably with 4G now under discussion Much of this story has been chronicled largely on the Internet but the information is in tens of thousands of bits and pieces and a large part of it is either misleading or just plain wrong Here Peter Curwen and Jason Whalley introduce the outcomes of research that has involved the compilation of a unique database which details every licence and launch worldwide involving 3G The authors discuss the structure of the industry and the strategic behaviour of operators as well as the social consequences of the spread of 3G They examine the role of new entry upon competition and present analysis of the main operators involved the development of handsets and especially smartphones A number of country case studies are included This comprehensive and up to date volume includes a number of country studies and is written by two of the world s foremost researchers on this industry Mobile Telecommunications in a High Speed World will serve the needs of students academics and those involved or contemplating involvement with the telecoms industry Why pay thousands of dollars to consultancies to separate the wheat from the chaff with respect to 3G when you can read this book

**Advanced Guidance and Control Aspects in Robotics** ,1994 To ensure the capability of defense a demand for equipment and systems which can be embraced under the title of Robotics will emerge in the near future In this context Robotics represents a specific problem area involving all the guidance and control functions which are associated with achieving goal oriented autonomous behavior in structured and unstructured environments for mobile and manipulator systems as applied to ground sea air and space operations Related robotic systems must combine constituent functions such as intelligent decision making control manipulation motion sensing and communication The scope of the special course will cover new developments in the areas of autonomous navigation for planetary and surface systems and control and operations of remote manipulators *Motorola's Droid 2* Mohanbir S. Sawhney,John Miniati,Patrick Kim,Pallavi Goodman,2016 After it introduced the extremely successful Droid smartphone into the market in 2009 Motorola quickly moved to develop the next generation Droid 2 before the next wave of smartphones including the rumored iPhone 4 flooded the market The development process was moving smoothly for the company when Verizon its biggest partner dropped a bombshell It wasn't happy with the mechanical camera button on the Droid 2 and wanted it to be changed to a software button like the iPhone's This case explains how Motorola dealt with this awkward dilemma **Motorola's Droid 2** Mohanbir S. Sawhney,2017 After it introduced the extremely successful Droid smartphone into the market in 2009 Motorola quickly moved to develop the next generation Droid 2 before the next wave of smartphones including the rumored iPhone 4 flooded the market The development process was moving smoothly for the company when Verizon its biggest partner dropped a bombshell It wasn't happy with the mechanical camera button on the Droid 2 citing customer feedback and wanted it to be changed to a software button like the iPhone's This request immediately placed Motorola in the proverbial horns of a dilemma On the one hand it couldn't brush away the request of its biggest and most important partner On the other hand changing the camera button

now would mean delaying the Droid 2's entry into the market. Should the Droid 2 team remove the camera's hardware button in favor of a software button per Verizon's request or not? John Smith, the product manager, leads the cross-functional Droid 2 team. The case setting is an emergency war room meeting to address this critical issue just weeks prior to launch. John's objective is to obtain the salient facts and opinions of team members quickly so he can make an informed recommendation to his boss by the end of the day. He is concerned that this last minute request for a design change will not only threaten to delay the launch, which would have significant financial implications, but could potentially create deep fissures in a hitherto effective team that had been running like a well-oiled machine. The case puts students in a situation that simulates a real world discussion and allows them to experience what it is like as a product manager to orchestrate a meeting with cross-functional teams that have conflicting priorities and agendas. It illustrates the challenges a product manager faces while striving to make important decisions with little or no direct authority over the various teams. After reading and analyzing this case, students will be able to:

- Experience the dynamics of cross-functional teams in product management.
- Practice running effective and productive meetings.
- Practice bringing together various personalities and points of view.
- Understand the importance of setting goals and clear expectations.
- Internalize the importance of building relationships and influencing teams even when you do not have direct authority.
