1478, a Year in Leonardo da Vinci's Career Edoardo Villata, 2021-03-01 1478 was the year in which Leonardo da Vinci aged 26 obtained his first official commission and witnessed the Pazzi Conspiracy against the Medici family In that year he probably opened his independent workshop leaving that of his master Andrea del Verrocchio and in its final months he began to paint two paintings representing the Virgin Mary One of these paintings is very likely the Benois Madonna at the State Hermitage St Petersburg a work that marks a strong change in Leonardo's style and power of expression and his representation of light and human emotions This book provides an in depth analysis of Leonardo's growth as an artist in this year detailing his training his culture his collaboration with Verrocchio and his engagement in the artistic and cultural life of 1460s and 1470s Florence

The Origins of Statics Pierre Duhem, 2012-12-06 If ever a major study of the history of science should have acted like a sudden revolution it is this book published in two volumes in 1905 and 1906 under the title *Les origines de la statique* Paris the place of publication and the Librairie scientifique A Hermann that brought it be enough of a guarantee to prevent a very different outcome Without prompting anyone for some years yet to follow up the revolutionary vistas which it opened up *Les origines de la statique* certainly revolutionized Duhem's remaining ten or so years He became the single handed discoverer of a vast new land of Western intellectual history Half a century later it could still be stated about the suddenly proliferating studies in medieval science that they were so many commentaries on Duhem's countless findings and observations Of course in 1906 Paris and the intellectual world in general were mesmerized by Bergson's *Evolution créatrice* freshly off the press It was meant to bring about a revolution Bergson challenged head on the leading dogma of the times the idea of mechanistic evolution He did so by noting among other things that to speak of vitalism was at least a roundabout recognition of scientific ignorance about a large number of facts concerning life processes He held high the idea of a vital impetus passing through matter and indeed through all matter or the universe an impetus that could be detected only through intuitive knowledge
