

Voith Schneider Propeller

Voith Turbo Schneider Propulsion provides customized propulsion systems for the full range of applications from harbor and escort duties, through to ferries, military applications and special ships.

Built-in Voith Schneider Propeller

Voith Water Tractor "Blout", Norway

Double-ended ferry "Rheinthal", Germany

The Voith Schneider Propeller (VSP) delivers thrust in all directions. It is a fast, continuously variable and precise vessel propulsion system combining propulsion and steering in a single unit. VSP-equipped vessels do not require rudders. Thrust and steering forces between zero and maximum can be generated in any direction.

On Voith Schneider Propellers the propeller blades protrude at right angles from the rotor casing and rotate around a vertical axis. Each propeller blade performs an oscillatory motion around its own axis which is superimposed on the uniform rotary motion. The VSP is fitted in the vessel so that only the blades protrude from the hull. The blades themselves are manufactured from high-strength materials and are extremely robust.
