Caught in the Act Cyril Julie, Lorna Holtman, Charles R. Smith, 2019-12-11 The research reported in Caught in the Act draws together the insights gained from a continuous professional development initiative for high school mathematics teachers teaching in low socio economic status and socially challenged environments in South Africa The chapters show the possibilities for enhancing achievement in school mathematics if a strength based approach is adopted to develop teaching with teachers and when their concerns are taken seriously The book demonstrates that the ecological relevance fitness for the context in which teachers are teaching of the goods developed and distributed by initiatives should be a major consideration to offer hope for sustainable implementation to improve school mathematics education The book is of interest to mathematics teachers school leaders mathematics curriculum advisors policy makers and researchers **Italy and**

Australia Gabriele Abbondanza, Simone Battiston, 2023-12-30 This book offers a novel and comprehensive reappraisal of current relations between Italy and Australia For the first time it expands the scope of analysis by encompassing and critically reviewing research avenues that have been understudied so far In order to pursue this objective it provides innovative analyses on bilateral history reciprocal migration socio cultural ties international relations and trade comparative politics and scientific cooperation By adopting a multidisciplinary approach this book makes a significant contribution to multiple disciplinary literatures benefitting social science scholars policymakers and professionals working in a number of fields Mindful of the wide scope and multidisciplinary nature of this innovative research the editors oversee a careful balance of different theories methodologies sources and data in accordance with the conventions of each discipline employed in this volume As a result this book encourages a broader and more nuanced understanding of Italian Australian relations in the 21st century Discrimination based on Colour, Ethnic Origin, Language, Religion and Belief in Turkey's Education System

Nurcan Kaya, 2015-10-27 The Turkish government is urged to make a fundamental shift in its approach to education by Minority Rights Group International MRG in a new report A long standing focus on state building has been supplemented by increasing emphasis on religious teaching Both feature strongly in the education system in Turkey making schools a focus of discrimination The report Discrimination based on Colour Ethnic Origin Language Religion and Belief in Turkey's Education System reveals evidence of discrimination of minority groups and suggests comprehensive reforms to effectively ensure equality The national education system which for decades aimed to create young Turkish nationalists has in recent years become a vehicle for raising young religious Turkish nationalists says Nurcan Kaya Turkey Coordinator of Minority Rights Group International Religious education is compulsory from grade four in primary schools While some information on world religions has been introduced the emphasis remains on teaching Sunni Muslim religious practices Children of Jewish and Christian families may apply to opt out but the process can be cumbersome and in many schools alternatives are not provided for them Non Muslim students who have opted out can still find themselves having to remain in the religious instruction class

or alternatively having to wander in the school corridor making them vulnerable to taunts from pupils and even teachers The opt out possibility is still not available to children of other minorities Another issue is mother tongue education In 2012 a new elective on the living languages and dialects in Turkey was introduced but due to various limitations minorities remain marginalised others in the education system Subsequent to the 2012 reform the report monitors discrimination in the formal education system in the period of the academic year of 2014 2015 The findings are based on the field work of the Monitoring Discrimination in Education Network an alliance of 16 organizations working in Turkey The report compiles numerous cases of discrimination based on language religion ethnicity skin colour and the level of income In order to bring about a fundamental solution to these problems in the education system the government must prioritise developing an approach that sees all groups as equal and that responds to demands for rights based on such an understanding of equality says Kaya The report highlights that Turkey has no anti discrimination law or an equality commission to which victims of discrimination can apply The existing legislation contains no effective and accessible means of judicial remedies or compensation Therefore many discriminatory practices are not reported to school administrations The entire education system is based on Turkishness Non Turkish groups are either not referred to or referred in a negative way says Kaya Education system has played a significant role in deepening conflict in society The positive representation of other groups in the education system would contribute to social peace and harmony In order to resolve the many problems in the education system that the current approach causes the overall aim of government education policy should be cleared of ideological references and the protection of children s best interests and the right to education in line with international standards should be considered its fundamental goal says the report

The Flight of Icarus Yiannis Drossos, 2020-12-10 This book provides a detailed analysis of the institutional transformations brought about by the financial crisis focusing on the institution building course of Europe and the Constitution bending course in several Member States It discusses the seemingly contradictory interplay between national and European institutions and the law resulting from the crisis arguing that the anti crisis exceptionality constitutes the matrix of the new normality of the reformed European economic governance The author carries out a critical analysis of the new economic governance and its case law with regular reference to relevant political episodes key economic figures and to the hitherto lax modes and rules The author also offers deep insights into the Greek adjustment programme and the crisis related Greek and Portuguese constitutional case law presented in comparison with the German and French case law The book concludes with a critical overview of the profound mutations in the role of national Constitutions instigated by the new European economic governance and the emergence of a democratically deficient meta constitutional mode of functioning of both the European institutions and national Constitutions
