MARKING GUIDELINES

ACCOUNTING

(PAPER 1)

12 pages

MARKING PRINCIPLES:

1. Unless otherwise stated in the marking guidelines, penalties for foreign items are applied only if the candidate is not losing marks elsewhere in the question for that item (no penalty for misplaced item). No double penalty applied.
2. Penalties for placement or poor presentation (e.g. details) are applied only if the candidate is earning marks on the figures for that item.
3. Unless otherwise stated, give full marks for correct answer. If answer is incorrect, mark workings.
4. If a pre-adjustment figure is shown as a final figure, allocate the part-mark for the working for that figure (not the method mark for the answer). Note: if figures are stipulated in memo for components of workings, these do not carry the method mark for final answer as well.
5. Unless otherwise indicated, the positive or negative effect of any figure must be considered to award the mark. If no + or – sign or bracket is provided, assume that the figure is positive.
6. Where indicated, part-marks may be awarded to differentiate between differing qualities of answers from candidates.
7. If candidates provide more than the required number of responses, inspect all responses to give benefit to the candidate. Penalties may be applied for foreign entries if candidates earn full marks on a question (max. -2 per Q).
8. Where penalties are applied, the marks for that section of the question cannot be a final negative.
9. Where method marks are awarded for operation, marker must inspect reasonableness of the answer.
10. Operation means 'check operation'. 'One part correct' means operation and one part correct. Note: check operation must be +, -, x, ÷, or per memo.
11. In calculations, do not award marks for workings if numerator & denominator are swapped – this also applies to ratios.
12. In awarding method marks, ensure that candidates do not get full marks for any item that is incorrect at least in part. Indicate with a 0.
13. Be aware of candidates who provide valid alternatives beyond the marking guideline. Note that one comment could contain different aspects.
14. Codes: f = foreign item; p = placement/presentation.

OECD Food and Agricultural Reviews Agricultural Policies in the Philippines OECD,2017-04-07 This report analyses Philippine agricultural policy Agriculture provides 30% of total employment in the Philippines and represents 11% of its Gross Domestic Product The Philippines has had notable recent overall economic success yet improving agricultural performance remains challenging

Global Agriculture and the American Farmer Kimberly Ann Elliott,2017-06-27 The United States is one of the world s largest producers and exporters of a range of agricultural commodities and the largest provider of foreign assistance so U S policies have big effects on global food security and other global public goods linked to agriculture On the positive side of the ledger President Obama created the Feed the Future aid initiative to promote agricultural development in poorer countries as a tool to achieve the global goals of ending hunger and extreme poverty which are mostly rural But that generosity is undercut by U S support for farmers that distorts global markets and ignores negative spillovers for the rest of the world In this book Elliott focuses on three policy areas that are particularly damaging for developing countries traditional agricultural subsidy and trade policies that support the incomes of American farmers at the expense of farmers elsewhere the biofuels mandate which in its current form increases market volatility while doing little if anything to mitigate climate change and weak regulation of antibiotic use in livestock which contributes to the global spread of drug resistant super bugs While noting that broad reforms are needed to fix these problems Elliott also identifies practical steps that U S policymakers could take in the relatively short run to improve farm policies for American taxpayers and consumers as well as for the poor and vulnerable in developing countries

Agriculture, food security, and nutrition in Malawi: Leveraging the links Aberman, Noora-Lisa,Meerman, Janice,Benson, Todd,2018-02-22 Although the Malawian food supply is shaped largely by trends in smallholder food crop production Ma lawi s decades long focus on improving smallholder productivity has only moderately improved food secu rity and nutrition outcomes Country statistics indicate an estimated 36 7 percent of rural Malawian house holds failed to access sufficient calories between 2010 and 2011 During the same period 47 percent of children under the age of five years were esti mated to be stunted in their growth These indicators imply that some Malawian diets are lacking in terms of quantity total calories consumed and most are lacking in terms of quality sufficient calories derived from nutrient dense foods such as meat fish eggs dairy legumes fruits and vegetables Good nutrition requires both enough total calories quantity and enough vitamins and minerals per calorie quality How can Malawi better leverage its smallholder agriculture sector to improve nutrition This report provides a series of primary and secondary data anal yses that examine different aspects of this question

Regulating Short Food Supply Chains in the EU Mirta Alessandrini,2024-11-30 This volume presents a thorough analysis of the concept and role of Short Food Supply Chains

SFSCs within the EU legal framework with a two fold aim first it shows the pitfalls of the current legal scenario which often limits alternatives rather than promoting them and second it provides a new conceptualisation for SFSCs under EU law by delineating and integrating all their distinctive features Agricultural landscapes in the EU are now undergoing fundamental changes revealing an increasing interest in SFSCs as a tool for promoting both local products and their food systems Despite being the backbone of the EU agricultural system SFSCs position in the current socioeconomic narrative has not been sufficiently fostered In response the book traces how SFSCs have historically been dealt with under the agricultural rules of the CAP and to a much lesser extent those relating to internal market food law delving into the intricate relationship between agricultural and food law The integration of these two disciplines into an agri food law domain represented a pivotal shift in legal discourse in particular in the context of SFSC regulation The legal analysis extends its scope to encompass spatial and historical dimensions enriching the contextual understanding of regulatory frameworks over time and across geographical boundaries This new conceptualisation does not aim to establish a universal set in the stone legal definition for SFSC applicable across disciplines Rather it seeks to identify common themes and key features among various SFSC initiatives These themes serve as the foundation for determining a set of minimum legal requirements for the recognition and valorisation of SFSC initiatives at the EU level which Member States can then tailor to their specific needs The goal is to lay the groundwork for developing a concept that can be effectively operationalised across different sectors and geographical dimensions The book makes a substantial contribution to the current academic debate filling a significant gap in the existing CAP literature On the one hand it provides the first comprehensive and systematic analysis of all the measures that have addressed small farmers and SFSCs from the CAP reforms up to the present day On the other by adopting a new multidisciplinary perspective encompassing legal sociological and agri food studies it raises new questions on the role of short supply chains in light of the Farm to Fork Strategy and beyond

provides a multidisciplinary analysis of the impact of Brexit on British agriculture and associated areas discussing the Common Agricultural Policy and the Agriculture Act 2020 The Brexit referendum provoked new debates and questions over the future of agriculture in Britain and the potential positive and negative impacts of Brexit on both farmers and consumers These debates as well as the ensuing proposals relevant to the Agriculture Act 2020 have exposed the multidimensional effects of Brexit when it comes to agriculture With a focus on profitability the rights of farmers environmental protection as well as animal welfare this book brings together an interdisciplinary analysis of the future of British agriculture in post Brexit Britain More specifically it addresses the criticisms over the Common Agriculture Policy presents an analysis of the Agriculture Act 2020 and considers suggestions for future developments Through this analysis the book suggests a way towards the future with a positive outlook towards a competitive and sustainable agriculture that will satisfy the needs of farmers and consumers while ensuring environmental protection animal welfare and rural development This book will be of great interest to students and scholars of food and agricultural policy and politics agroecology and rural development as well as policymakers involved in Britain s post Brexit environmental policy
