## **Memo Agricultural Science November 2013 Caps:**

Global Agriculture and the American Farmer Kimberly Ann Elliott, 2017-06-27 The United States is one of the world's largest producers and exporters of a range of agricultural commodities and the largest provider of foreign assistance so U.S. policies have big effects on global food security and other global public goods linked to agriculture. On the positive side of the ledger President Obama created the Feed the Future aid initiative to promote agricultural development in poorer countries as a tool to achieve the global goals of ending hunger and extreme poverty which are mostly rural. But that generosity is undercut by U.S. support for farmers that distorts global markets and ignores negative spillovers for the rest of the world. In this book Elliott focuses on three policy areas that are particularly damaging for developing countries: traditional agricultural subsidy and trade policies that support the incomes of American farmers at the expense of farmers elsewhere; the biofuels mandate which in its current form increases market volatility while doing little if anything to mitigate climate change; and weak regulation of antibiotic use in livestock which contributes to the global spread of drug-resistant super bugs. While noting that broad reforms are needed to fix these problems, Elliott also identifies practical steps that U.S. policymakers could take in the relatively short run to improve farm policies for American taxpayers and consumers as well as for the poor and vulnerable in developing countries.

**Handbook on Cohesion Policy in the EU** Simona Piattoni, Laura Polverari, 2016-08-26 This Handbook covers all major aspects of EU Cohesion policy, one of the most significant areas of intervention of the European Union. Over five parts it discusses this policy's history and governing principles, the theoretical approaches from which it can be assessed, the inter-institutional and multi-level dynamics that it tends to elicit, its practical implementation and impact on EU member states, its interactions with other EU policies and strategies, and the cognitive maps and narratives with which it can be associated. An absolute must for all students of the EU.

**Building Sustainable Agriculture for Food Security in the Euro-Mediterranean Area** Maria Cristina Paciello, 2015-06-19 Sustainable agro-culture and food security are of particular concern for the countries of the Middle East and North Africa (MENA) region and represent one of the biggest challenges facing the area. As a consequence of the region's heavy reliance on food imports, the sharp increase in food prices since 2007 and the consequent world food crisis has had macro-economic problems: inflation, trade deficits, fiscal pressure, increased poverty and political instability. This challenge, coupled with the consequences of environmental degradation, water scarcity, urbanization and climate stress, call for the urgent development of sustainable agriculture. However, agriculture has mostly been ignored in Euro-Mediterranean relations due to strong opposition from the EU. However, academics and policymakers have increasingly acknowledged that agriculture needs to be placed at the core of Euro-Mediterranean regional cooperation. Given the sensitiveness and strategic importance of agriculture for both shores of the Mediterranean, the IAI and the OCP Policy Center jointly organized a two-day conference in Rabat on November 20-21, 2014, to discuss food security and agriculture challenges in the framework of Euro-Mediterranean relations. The present volume

collects the updated and revised versions of the twelve papers that were discussed in that meeting      **European Union Political Economy** Konstantinos Hazakis, 2018-09-15 The European political economy policy and theory provides students researchers and policy makers with a profound understanding of the theory and policy of the EU The book covers in a comprehensive way the key issue areas of the European Union activity and it includes an analysis of all the important current developments in Europe such as the Brexit the European Union sovereign debt crisis the European economic governance problems and the macroeconomic adjustment challenges within Eurozone The book also includes critical resources for readers and students such as review questions appendixes references and further reading lists More specifically the textbook explains thoroughly the institutional economic and policy characteristics of the fundamental issue areas of European economy It outlines the institutions and mechanisms of European union Eurozone the common agricultural regional and trade policies the impact of the single market and the single currency on European economy the enlargement process and the key questions on the European macroeconomic adjustment process In each chapter the book explains not only what is taking place in European economy but also which the feasible options of the European policy agenda are The textbook enables readers to apply conceptual and theoretical knowledge to economic and political processes of European integration

Civic Engagement in Food System Governance Alan R. Hunt, 2015-10-05 The local food movement is one of the most active of current civil engagement social movements This work presents primary evidence from over 900 documents interviews and participant observations and provides the first descriptive history of local food movement national policy achievements in the US from 1976 to 2013 and in the UK from 1991 to 2013 together with reviews of both the American and British local food movements It provides a US UK comparative context significantly updating earlier comparisons of American British and European farm and rural policies The comparative perspective shows that over time more effective strategies for national policy change required social movement building strategies such as collaborative policy coalitions capacity building for smaller organizations and policy entrepreneurship for joining together separate rural farming food and health interests In contrast narrowly defined single issue campaigns often undermined long term policy change even if short term wins emerged By profiling interviews of American and English movement leaders policymakers and funders the book demonstrates that democratic participation in food policy is best supported when funders incentivize groups to work together and overcome their differences      Wilted Julie Guthman, 2019-08-20 Strawberries are big business in California They are the sixth highest grossing crop in the state which produces 88 percent of the nation's favorite berry Yet the industry is often criticized for its backbreaking labor conditions and dependence on highly toxic soil fumigants used to control fungal pathogens and other soilborne pests In Wilted Julie Guthman tells the story of how the strawberry industry came to rely on soil fumigants and how that reliance reverberated throughout the rest of the fruit's production system The particular conditions of plants soils chemicals climate and laboring bodies that once made strawberry production so lucrative in the
