Memorandum Feb March 2015 Mathematics:

Pathways to Reform Alexandra W. Logue, 2017-09-08 A personal account of the implementation of a controversial credit transfer program at the nation's third largest university Change is notoriously difficult in any large organization Institutions of higher education are no exception From 2010 to 2013 Alexandra Logue then chief academic officer of The City University of New York led a controversial reform initiative known as Pathways The program aimed to facilitate the transfer of credits among the university's nineteen constituent colleges in order to improve graduation rates a long recognized problem for public universities such as CUNY Hotly debated Pathways met with vociferous resistance from many faculty members drew the attention of local and national media and resulted in lengthy legal action In *Pathways to Reform* Logue the figure at the center of the maelstrom blends vivid personal narrative with an objective perspective to tell how this hard fought plan was successfully implemented at the third largest university in the United States Logue vividly illustrates why change does or does not take place in higher education and the professional and personal tolls exacted Looking through the lens of the Pathways program and factoring in key players she analyzes how governance structures and conflicting interests along with other institutional factors impede change which Logue shows is all too rare slow and costly In this environment she argues it is shared governance combined with a strong central decision making authority that best facilitates necessary reform Logue presents a compelling investigation of not only transfer policy but also power dynamics and university leadership Shedding light on the inner workings of one of the most important public institutions in the nation *Pathways to Reform* provides the first full account of how despite opposition a complex higher education initiative was realized All net royalties received by the author from sales of this book will be donated to The City University of New York to support undergraduate student financial aid

Diversity, Inclusion, Equity and the Threat to Academic Freedom Martín López-Corredoira, 2022-09-05 There can be no doubt that discrimination based on sex race ethnicity religion or beliefs should not be tolerated in academia Surprisingly however in recent years policies of Diversity Inclusion and Equity DIE officially introduced to counteract discrimination have increasingly led to quite the opposite result the exclusion of individuals who do

not share a radical woke ideology on identity politics feminism other gender activisms critical race theory etc and to the suppression of the academic freedom to discuss such dogmas This subversion of academia disguised Trojan horse style as universal human rights advocacy is unacceptable because academia must be politically neutral and protect freedom of speech a cornerstone of professional scholarly activity without which universities as we know them will slowly but surely suffocate Our purpose here is to put together some particularly illustrative cases of such repression in a single book testifying to a ubiquitous trend within western culture irreducible to a few isolated complaints The essays contained here illustrate the abuse of power censorship and witch hunts at many universities and research centres in the name of DIE List of coauthors in alphabetical order Dorian Abbot Tomonori Agoh Gerhard Amendt Ivar Arpi David Benatar Peter Boghossian Civitas Research Team David D az Pardo de Vera Pedro Domingos Janice Fiamengo tienne Forest Jorge Gibert Galassi Norman Goldstuck Jos L Gonz lez Quir s Lawrence M Krauss Patrick LaBelle Mart n L pez Corredoira Heather Mac Donald Martin Malmgren Jordan Peterson Constantin Polychronakos Erik J Olsson Philip C Salzman Alessandro Strumia Tom Todd Andrei Yafaev **Proceedings of the 13th International Congress on Mathematical Education** Gabriele Kaiser,2017-10-31 This book is open access under a CC BY 4 0 license The book presents the Proceedings of the 13th International Congress on Mathematical Education ICME 13 and is based on the presentations given at the 13th International Congress on Mathematical Education ICME 13 ICME 13 took place from 24th 31st July 2016 at the University of Hamburg in Hamburg Germany The congress was hosted by the Society of Didactics of Mathematics Gesellschaft f r Didaktik der Mathematik GDM and took place under the auspices of the International Commission on Mathematical Instruction ICMI ICME 13 brought together about 3 500 mathematics educators from 105 countries additionally 250 teachers from German speaking countries met for specific activities Directly before the congress activities were offered for 450 Early Career Researchers The proceedings give a comprehensive overview on the current state of the art of the discussions on mathematics education and display the breadth and deepness of current research on mathematical teaching and learning processes The book introduces the major activities of ICME 13 namely articles from the four plenary lecturers and two plenary panels articles from the five ICMI awardees reports from six national presentations three reports from the thematic afternoon devoted to specific features of ICME 13 Furthermore the proceedings contain descriptions of the 54 Topic Study Groups which formed the heart of the congress and reports from 29 Discussion Groups and 31 Workshops The additional important activities of ICME 13 namely papers from the invited lecturers will be presented in the second volume of the proceedings [Yearbook of International Organizations 2014-2015, Volumes 1a & 1b \(Set\)](#) Union of International Associations,2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events **Business Mathematics** Karl J. The Top Books of the Year Memorandum Feb March 2015 Mathematics The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have enthralled audiences this year. Memorandum Feb March 2015 Mathematics : Colleen Hoover "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Memorandum Feb March 2015 Mathematics : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
