Memorandum Geography June 2015:

Confronting Crisis and Precariousness Stefan Schmalz, Brandon Sommer, 2019-07-24 The 2008 global financial crisis and the subsequent Eurozone crisis triggered dramatic changes in European labour relations Unemployment and precariousness increased considerably This was further exacerbated by austerity measures leading to declining minimum wages and layoffs in the public sector These structural changes varied considerably by country but collectively pose challenges to organized labour as they confront neoliberal restructuring Concurrently recent social struggles continue to develop with unemployed and precarious workers playing a major role as protest actors Focusing on the triangular relationship of precariousness trade unions and social movements this book draws on a range of exciting cases both comparative and country case studies in order to understand how the shadow of the crisis still haunts organized labour in Europe The chapters in this collection each offer a unique perspective on how the results of the crisis in Western Southern and Eastern Europe are leading to a variety of new social movements as a consequence of increased precariousness and also how trade unions are attempting to respond

Missile Contagion Dennis M. Gormley, 2008-05-30 Most books on missile proliferation focus on the spread of ballistic missiles or cruise missiles not both Gormley's work however explains why cruise missiles are beginning to spread widely but does so by explaining their spread in the context of ballistic missile proliferation It therefore treats both ballistic and cruise missile proliferation as related phenomenon This work also focuses evenhandedly on both nonproliferation and defense policy including missile defenses and counterforce doctrines to fashion a set of integrated strategies for dealing with ballistic and cruise missile proliferation Signs of missile contagion abound In this study Gormley argues that a series of rapid and surprising developments since 2005 suggest that the proliferation of missiles capable of delivering either weapons of

mass destruction or highly accurate conventional payloads is approaching a critical threshold The surprising fact is that land attack cruise missiles not ballistic missiles constitute the primary problem Flying under the radar both literally and figuratively land attack cruise missiles add a dangerous new dimension to protecting U S security interests and preventing regional military instability Gormley asserts that cruise missiles are not destined to supplant ballistic missiles rather they are likely to join them because when both are employed together they could severely test even the best missile defenses Worse yet Gormley argues land attack cruise missiles are increasingly being linked to preemptive strike doctrines which are fueling regional arms races and crisis instability This work explains why an epidemic of cruise missile proliferation long forecasted by analysts has only recently begun to occur After first assessing the state of ballistic missile proliferation Gormley explores the role of three factors in shaping the spread of cruise missiles These include specialized knowledge needed for missile development narrative messages about reasons for acquiring cruise missiles and norms of state behavior about missile nonproliferation policy and defense doctrine This book then addresses the policy adjustments needed to stanch the spread of cruise missiles in the first place or barring that cope militarily with a more demanding missile threat consisting of both cruise and ballistic missiles

Landscape and Identity Kurt D. Springs, 2015 The Chalcolithic wedge tombs of Ireland represent a dramatic re emergence of megalithism over a millennium after most Neolithic megaliths were built and many centuries after most had gone out of use This resurgence of building monuments associated with the dead may well have been associated with a period of social instability caused by the expansion of exchange networks and associated with the introduction of metallurgy Regional group and individual identities all seem to have undergone change at this time probably in a dynamic demographic context Variations in the distribution and scale of wedge tombs in Co Clare on the west coast of Ireland provide an interesting study that may reveal a pattern of clan affiliations status competition and enduring links to an important and ancient locale
