some four decades ago with the emergence of fast digital computing All computer vision techniques could be regarded as a  
form of pattern recognition in the broadest sense of the term Conversely if one looks through the contents of a typical  
international pattern recognition conference proceedings it appears that the large majority perhaps 70 80% of all pattern  
recognition papers are concerned with the analysis of images In particular these sciences overlap in areas of low level vision  
such as segmentation edge detection and other kinds of feature extraction and region identification which are the focus of
