

# The Stakeholder Analysis Grid matrix

## HIGH POWER, HIGH INTEREST

Key players who must be managed closely and engaged in the decision-making process. These stakeholders have significant influence on the success of the project and are highly interested in the outcome. For example, the CEO of the company, or a major investor.

## HIGH POWER, LOW INTEREST

Decision makers who need to be kept informed, but not necessarily engaged. These stakeholders have significant influence on the success of the project, but may have other priorities and are less interested in the outcome. For example, a government agency that approves permits for the project.

## LOW POWER, HIGH INTEREST

Stakeholders who are affected by the decision, but have little power to influence it. These stakeholders may need to be consulted and kept informed, but do not need to be engaged in the decision-making process. For example, local residents living near the project site.

## LOW POWER, LOW INTEREST

Stakeholders who are not significantly affected by the decision and can be largely ignored. These stakeholders do not need to be engaged or kept informed. For example, individuals living in another country or region, or employees in a different department.
