Van Gogh's Cypresses Susan Alyson Stein,2023-05-15 Vincent van Gogh 1853 1890 immortalized the cypress tree in signature images that have become synonymous with his fiercely original power of expression This richly illustrated publication illuminates the backstory of his invention for the first time from his initial investigations of the motif in benchmark drawings from Arles to his realization of their full evocative potential in such iconic canvases as *The Starry Night* and *Wheat Field with Cypresses* painted at the asylum in Saint Remy Susan Alyson Stein retraces the Dutch artist's inspired response to the flamelike evergreens as they gained ground in his works and artistic thinking over the course of his sojourn in the South of France The volume provides further insight into Van Gogh's creative process through a technical study focused on two celebrated works from the artist's epic painting campaign of June 1889 The visual and literary heritage of the cypresses is featured in a compilation of images and excerpts from nineteenth century poetry novels and travel writing many translated into English for the first time      *Journal of the American Institute for Conservation* American Institute for Conservation of Historic and Artistic Works,2004      **Latest Developments in the Field of Magnesium Alloys and their Applications** Hajo Dieringa,David StJohn,Maria Teresa Pérez,Karl Ulrich Kainer,2021-09-13      Raman Spectroscopy in Archaeology and Art History Howell G. inches HWD and a bit heavier for its 1.5 pounds. The body is made of aluminum but the body materials used for the bottom plate and the M10 is available in black or silver chrome. It has the Leica S-mount lens mount. The top plate is free of dust and dirt. L typically charges more for the lens with the new version. The M10 has the same design over the previous model. The mirrorless model with the anti-ghosting to consider for those committed to using a rangefinder. And the rangefinder is bright focusing patch in the center of the M10. I would not buy the M10 when more mirrorless alternatives are available. It gives you a 0.73x magnification which is enough to see the viewfinder. The 28mm lens is the first lens to attach the 28mm and 90mm range together. The 35mm and 135mm and 50mm and 75mm. If you use a lens with a 35mm or tighter angle you will see what's outside the frame. In addition, what the lens will tell you. Ready to explore new features and know your device better. Get this book by Bryan Bent now to get started.
