Handbook begins with five sections covering the essential topics of the technical communication process from planning to production. The remaining four sections cover topics all technical writers need to know to succeed in their fields including Internet use, correspondence, and a wide variety of technical documents. Unique qualities of this handbook include discussions of brainstorming, mind mapping, and freewriting; evaluating Internet sources; style, tone, and bias; designing and illustrating on line as well as print documents; and major editing strategies. Complete sections are devoted to using the Internet and developing a wide variety of interpersonal skills. Lists of practical tips and computer tools provide expert advice to students and professionals alike. Both the tips and the section-by-section bibliographies reflect the input of practicing professionals.

Technical Communication in the Global Community Deborah C. Andrews, 2001. Today's technical professionals need to reach audiences and collaborate on projects across borders of culture, language, and technology. This versatile, inexpensive book encourages readers to think critically in a changing environment with the goal of communicating successfully with people who may not share their values or approaches. Uses descriptions, cases, and special feature boxes to provide guidelines for communicating effectively. Emphasizes information design in a global context throughout. Offers a greatly enhanced Website that updates the book and displays visual information in a powerful format. Streamlines discussion of planning and sentence structure and provides references for grammar assistance. The perfect communication reference for engineers, scientists, and other technical professionals.

The Writer's FAQs Muriel Harris, 2007. This brief handbook is the easiest pocket reference for students to use in any course where writing or research is required, as well as outside the classroom.
