Hensley, 2025-06-04 A study of how writers from the early phases of our prolonged climate emergency used aesthetic strategies to redefine the category of action What does it feel like to live helplessly in a world that is coming undone Nathan Hensley turns to Victorian literature to uncover a prehistory of this deeply contemporary sense of powerlessness For many in nineteenth century Britain their world seemed so scarred by human rapacity that restoring it seemed beyond the powers of any one individual Like George Eliot s characters in Middlemarch or the doomed lovers of Wuthering Heights observers of the gathering carbon economy felt themselves ensnared by interlocked and broken systems In the face of damage so vast and apparently irreversible what could possibly be done To answer this question Hensley shows that nineteenth century writers and artists devised new ways to understand action and hope They rescaled action away from the grandly heroic and toward minor adjustments and collaborative interventions They turned away from logical proofs and direct argumentation and instead called on aesthetic technologies like sonnets and fractured lyrics watercolor sketches and vast multiplot novels finding scope for action not at the level of the theme or the thesis but in gestures and details Ranging from J M W Turner s painterly technique to Emily Bront s dreamlike fragments and reading along the way works by Alfred Lord Tennyson H G Wells Lewis Carroll Gerard Manley Hopkins William Berryman Charlotte Bront George Eliot and Christina Rossetti Hensley s study makes an important contribution to Victorian studies and the environmental humanities **Climate Change**

Political Narratives in the Middle East and North Africa Wolfgang Mühlberger, Toni Alaranta, 2020-02-13 This book discusses the role of political narratives in shaping perceptions of instability and conceptions of order in the Middle East and North Africa MENA The authors illustrate how in times of socio political turmoil and outbursts of discontent such as the Arab Spring political entrepreneurs explain and justify their political agendas by complementing hard power solutions with attractive ideas and discursive constructions that appeal to domestic constituencies and geopolitical allies The book is divided into two parts The first focuses on non state actors such as confessional communities and ideological movements who aim to develop narratives that are convincing to their respective polities It also studies regional powers that seek to determine their positions in a competitive environment via distinctive narrations of order In part two the authors investigate the narratives of global players that aim to explain and justify their role in an evolving international order

Democracy Rules Jan-Werner Müller, 2025-10-16 A much anticipated guide to saving democracy from one of our most essential political thinkers Everyone knows that democracy is in trouble but do we know

what democracy actually is Jan Werner Müller author of the widely translated and acclaimed *What Is Populism* takes us back to basics in *Democracy Rules* In this short elegant volume he explains how democracy is founded not just on liberty and equality but also on uncertainty The latter will sound unattractive at a time when the pandemic has created unbearable uncertainty for so many But it is crucial for ensuring democracy's dynamic and creative character which remains one of its signal advantages over authoritarian alternatives that seek to render politics and individual citizens completely predictable Müller shows that we need to reinvigorate the intermediary institutions that have been deemed essential for democracy's success ever since the nineteenth century political parties and free media Contrary to conventional wisdom these are not spent forces in a supposed age of post party populist leadership and post truth Müller suggests concretely how democracy's critical infrastructure of intermediary institutions could be renovated reempowering citizens while also preserving a place for professionals such as journalists and judges These institutions are also indispensable for negotiating a democratic social contract that reverses the secession of plutocrats and the poorest from a common political world
