*Microsoft Silverlight 4 Business Application Development* Frank LaVigne, Cameron Albert, 2010 Annotation Microsoft Silverlight is a programmable web browser plug in that enables features including animation vector graphics and audio video playback features that characterize Rich Internet Applications Silverlight makes possible the development of RIA applications in familiar NET languages such as C and VB NET Silverlight is a great and growing Line of Business platform

and is increasingly being used to build business applications Silverlight 3 made a big step in LOB Silverlight 4 builds upon this further This book will enable NET developers to feel the pulse of business application development with Silverlight quickly This book is not a general Silverlight 3 4 overview book It is uniquely aimed at developers who require an introduction to building business applications with Silverlight This book will focus on building a suite of real world useful business applications in a practical hands on approach This book is for Net developers providing the answers to many questions that are encountered when creating business applications in Silverlight ultimately enabling rapid development with ease This book teaches you how to build business applications with Silverlight 3 and 4 Building a suite of applications it begins by introducing you to the basic tools and skills needed to get started in Silverlight development It then dives deeply into the world of business application development covering all the required concepts needed to build sophisticated business applications and provide a rich user experience Chapters include building a public website adding rich media to the website incorporating RIA into your website and among others By following the practical steps in this book you will learn what\_s needed to create rich business applications\_from the creation of a Silverlight application to enhancing your application with rich media and connecting your Silverlight application to various Data Sources Microsoft Silverlight 5 and Windows Azure Enterprise Integration David Burela,2012 This book is a step by step tutorial that shows you how to obtain the necessary toolset to create and run Silverlight Enterprise Applications on Azure The book also covers techniques practical tips hints and tricks for Silverlight interactions with Azure Each topic is written in an easy to read style with a detailed explanation given and then practical step by step exercises with a strong emphasis on real world relevance If you are an application developer who wants to build and run Silverlight Enterprise applications using Azure storage WCF Services and ASP providers then this book is for you You should have a working knowledge of Silverlight and Expression Blend However knowledge of Azure is not required since the book covers how to integrate the two technologies in detail *Microsoft Silverlight 5 Data and Services Cookbook* Gill Cleeren,2012 Written in a cookbook style this book offers learning and techniques through recipes It contains step by step instructions for developers who want to build rich data driven business applications using Silverlight or Windows Phone 7 The book is designed in such a way that you can refer to things chapter by chapter or read them in no particular order If you are a NET developer who wants to build professional data driven applications with Silverlight or Windows Phone 7 then this book is for you Basic experience of programming Silverlight and familiarity with accessing data using ADO NET in normal NET applications is required Pro Silverlight for the Enterprise Ashish Ghoda,2008-11-01 Microsoft Silverlight 2 is a new development platform designed to make the development of rich Internet applications RIAs far easier than has previously been possible Pro Silverlight for the Enterprise addresses the question of how you can bring Silverlight 2 to your company to provide rich Internet experiences that will interface cleanly with your existing application architecture The book begins with a clear discussion of why Silverlight is such a good choice

for developing RIAs and the implications that this has for your development decisions The options available will be demonstrated by constructing a simple web based training portal for a fictional enterprise which will be extended and altered to demonstrate the techniques and methods that you have available to you This includes accessing data using WCF and LINQ and considering how best to deploy your finished Silverlight application when it is complete The book also discusses the future of Silverlight for mobile and how to plan for its release This book is unique in that it focuses on how Silverlight can be applied in today s business environment rather than simply delving into the product s syntax and grammar in isolation Silverlight is discussed in context with consideration given to security scalability and deployment As such this book makes an excellent addition to any Silverlight library and extends your knowledge into practical areas that are rarely discussed

Microsoft Silverlight 4 Data and Services Cookbook Gill Cleeren, Kevin Dockx, 2011-04-22 This practical hands on cookbook is specifically designed for developers who want to build rich data driven business applications using Silverlight designed to show you how to interact with and handle multiple sources of data how to solve particular data problems and how to interact with services The material has been carefully selected from Packt s fuller Microsoft Silverlight 4 Data and Services Cookbook If you are a NET developer who wants to build professional data driven applications with Silverlight then this book is for you Basic experience of programming Silverlight and familiarity with accessing data using ADO NET in normal NET applications is required      **Managing Data and Media in Microsoft Silverlight 4** ,2012
