Aerospace Health and Safety: Today and the Future Irina Mordukhovich, Mardi A. Crane-Godreau, Eileen Mcneely, Christopher Scheibler, 2023-11-20 Aviation plays vital roles in commerce defense science and leisure travel Irrespective of the purpose of flight crew and passengers are challenged by exposure to a variety of environmental conditions that can differ widely from work and travel environments on the surface of the Earth With anticipated changes in aviation and space technology new challenges to health and safety of crew and passengers can be expected In this Research Topic we welcome contributions from those whose work and interests are relevant to the health and safety of crew and passengers This includes but is not limited to health and safety professionals FAA examiners corporate medical officers aerospace and occupational physicians physiologists military and scientific team

members public health professionals as well as engineers who are tasked with crew and passenger health and safety design projects While 4 1 billion passengers fly on commercial airlines annually and this figure is even higher when taking into account privately owned aircraft and military flight for the most part aviation is safe Passengers do arrive at their destinations with little concern to their own well being and flight is generally well tolerated However older flyers people with diagnosed or undiagnosed preexisting disease and other vulnerable passengers such as young children and pregnant women may be at risk of complications and crew may be at special risk due to the frequency and duration of their many flight related exposures Health and safety issues for crew and passengers include but are not limited to potentially severe circadian rhythm disruption potential health effects of low level cosmic ionizing radiation exposure at altitude reduced oxygen delivery and tissue hypoxia at cabin pressurization cabin air contamination by engine gases toxic materials used in uniforms and some cabin seat materials occupational noise pesticides used for cabin disinsection lack of adequate crew rest on layovers or between flights cardiovascular demands of flight and effects of flight related dehydration the current absence of screening protocols especially in the context of a rising number of elderly and vulnerable flyers lack of healthy nutrition at airports and in flight availability of food and hydration as well as adequate cabin temperature under delay conditions effects of alcohol use on flight related physiological and behavioral health risks anxiety and psychological distress associated with air travel the effects of long haul or ultra long haul flights on thromboembolic events as well as smoking cessation efforts and related psychological outcomes job related stress and harassment among crew Cosmic ionizing and non ionizing radiation exposure have drawn attention as have historic exposures of crew and passengers to second hand cigarette smoke The threat of political and interpersonal violence and altercations involving aviation cannot be overlooked On board medical emergencies run a wide gamut and the capacity to respond becomes more problematic as the duration of flights becomes longer or in the case of flight over oceans and the poles In addition in flight and post flight embolisms and myocardial infarctions are more prevalent than might be expected We hence encourage manuscripts that address in flight medical response including the capabilities on different types of aircraft on potential interventions by crew and medical volunteers In addition aviation as a vector for the carriage of disease is a significant concern to public health and security of populations world wide and we welcome submissions regarding infectious disease epidemiology and medicine as it relates to air travel Insects and occasional unplanned travel by birds and rodents can present additional public health concerns We are approaching an era where space travel may soon be increasingly common Future flights for near Earth orbit by leisure travelers and as well as travel to the moon and Mars raise a host of new questions with health and safety implications What are the proposed health and safety accommodations going to be Who will be allowed to travel Perhaps the most interesting question is who will make the rules

Wood-Polymer Composites K O Niska,M. Sain,2008-05-29 Wood polymer composites WPC are materials in which wood is impregnated with monomers that are then polymerised in the wood to tailor the material for special

applications The resulting properties of these materials from lightness and enhanced mechanical properties to greater sustainability has meant a growing number of applications in such areas as building construction and automotive engineering This important book reviews the manufacture of wood polymer composites how their properties can be assessed and improved and their range of uses After an introductory chapter the book reviews key aspects of manufacture including raw materials manufacturing technologies and interactions between wood and synthetic polymers Building on this foundation the following group of chapters discusses mechanical and other properties such as durability creep behaviour and processing performance The book concludes by looking at orientated wood polymer composites wood polymer composite foams at ways of assessing performance and at the range of current and future applications With its distinguished editors and international team of contributors Wood polymer composites is a valuable reference for all those using and studying these important materials Provides a comprehensive survey of major new developments in wood polymer composites Reviews the key aspects of manufacture including raw materials and manufacturing technologies Discusses properties such as durability creep behaviour and processing performance **Microbiology** Gerard J. Biotechnology: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2019-06-07 Biotechnology can be defined as the manipulation of biological process systems and organisms in the production of various products With applications in a number of fields such as biomedical chemical mechanical and civil engineering research on the development of biologically inspired materials is essential to further advancement Biotechnology Concepts Methodologies Tools and Applications is a vital reference source for the latest research findings on the application of biotechnology in medicine engineering agriculture food production and other areas It also examines the economic impacts of biotechnology use Highlighting a range of topics such as pharmacogenomics biomedical engineering and bioinformatics this multi volume book is ideally designed for engineers pharmacists medical professionals practitioners academicians and researchers interested in the applications of biotechnology *Primary Wood Processing* John C.F. Walker, 2006-09-13 Samuel Johnson of Boswell fame said about writing whatever is written without effort is in general read without pleasure and the unexamined word is not worth reading However even the most thoughtfully written text is unlikely to be described as a good read This book is not an exhaustive review Rather it is an uneven selection of examples whose interplay across disciplines hopefully illuminates what drives the practice of forest production wood processing and consumer preferences The choice of material is arbitrary reflecting personal biases It is a summary of material presented to students at the NZ School of Forestry at the University of Canterbury This book takes liberties with other peoples ideas weaving them into fresh themes that are at best a work in progress The philosopher Francis Bacon argued that science is a debate in progress not a body of knowledge and also truth emerges more readily from error than confusion We have taken the position that it is preferable to venture a reasoned opinion and be proved wrong than to waffle so don't swallow every sentence doubt

everything The reader's task is to unravel the conceits of generalizing and the risks of particularizing

Biodeterioration of Wooden Cultural Heritage Anastasia Pournou, 2020-10-27 Since prehistoric times and throughout the course of human evolution wood has been an integral part of all civilizations Wooden Cultural Heritage can be found worldwide providing valuable information on the social and economic context of human history Nonetheless as a natural cellulosic material wood shows low resistance to biodeterioration and thus wooden Cultural Heritage often fails to escape decomposition in both aquatic and terrestrial ecosystems This book provides a comprehensive overview on the biodeterioration of wooden Cultural Heritage and describes the decay mechanisms of key organisms and microorganisms encountered in aquatic and terrestrial ecosystems Cultural Heritage professionals researchers and academics may explore within this book the associations between deteriorogens habitats and decay which will assist them to understand wood biodeterioration and design effective prevention mitigation and remediation strategies The book presents case studies around the world to demonstrate the impact of biogenic deterioration on wooden Cultural Heritage and illustrates mechanisms and patterns in order to be a useful handbook of decay diagnosis Lastly by adopting a holistic approach to wood decay basic concepts of wood technology ecology and deteriorogens biology are introduced permitting readers of different scientific backgrounds to easily comprehend wood biodeterioration
