Mid Year Exam Grade11 Mathematics Memorandum2015:

Disability Rights and Religious Liberty in Education Bruce J. Dierenfield, David A. Gerber, 2020-07-06 In 1988 Sandi and Larry Zobrest sued a suburban Tucson Arizona school district that had denied their hearing impaired son a taxpayer funded interpreter in his Roman Catholic high school The Catalina Foothills School District argued that providing a public resource for a private religious school created an unlawful crossover between church and state The Zobrests however claimed that the district had infringed on both their First Amendment right to freedom of religion and the Individuals with Disabilities Education Act IDEA Bruce J Dierenfield and David A Gerber use the Zobrests story to examine the complex history and jurisprudence of disability accommodation and educational mainstreaming They look at the family s effort to acquire educational resources for their son starting in early childhood and the choices the Zobrests made to prepare him for life in the hearing world rather than the deaf community Dierenfield and Gerber also analyze the thorny church state issues and legal controversies that informed the case its journey to the U S Supreme Court and the impact of the high court s ruling on the course of disability accommodation and religious liberty

Ethics in the University James G. Speight, 2016-08-26 It is the continuous reports of unethical behavior in the form of data manipulation cheating plagiarism and other forms of unacceptable behavior that draw attention to the issues of misconduct The causes of misconduct are manifold whether it is the need to advance in a chosen discipline or to compete successfully for and obtain research funding Disappointingly individuals who are oriented to any form of dishonesty are individuals who had previously displayed little or no consideration for the feelings of others and are therefore more interested in themselves at the expense of the students and others recognizing them by any means necessary This ground breaking and honest examination of ethics in the university setting is unabashed in its descriptions of misconduct in the academic world The text is well furnished with numerous citations that point to academic misconduct and the final chapter deals with the means by which misconduct can be mitigated a strong reminder to everyone in the academic community that above board conduct must be part of our overall message of learning and part of the whole point of education in the first place A must have for academics and non academics alike this text is the second in a series of books on ethics by James G Speight and it is useful to anyone in any industry who is interested in ethical behavior and how to navigate the sometimes murky depths of our professional lives

School Effectiveness and Improvement Research, Policy and Practice Christopher Chapman, Paul Armstrong, Alma Harris, Daniel Muijs, David Reynolds, Pam Sammons, 2012-03-12 This book provides a contemporary overview of school effectiveness and improvement It charts the development theory and research in this area and looks at the contribution made to policy and practice It also challenges some assumptions that have become ingrained into the theoretical and methodological traditions of the field By challenging these orthodoxies it provides a framework that sets a new agenda and repositions the field to meet the emerging challenges of the twenty first century It argues that traditional measures of school effectiveness are challenged as systems

have attempted to adapt to a complex range of emerging agendas New theoretical perspectives are required which consider education and a broader set of outcomes This shift requires a rethink of how effectiveness and improvement have been understood by the field and a reconstruction by policy makers and practitioners Attention must be given to promoting equity as well as effectiveness so that one school or student s gain no longer means another s loss The field must develop new methodologies if inequities are to be challenged and a broader set of outcome measures are to be developed The two questions guiding this book are How can educational effectiveness and improvement research and practice support the development of a more equitable education service What are the key indicators of educational effectiveness and improvement and what are the new methodologies required to facilitate a shift from school effectiveness and improvement to educational effectiveness and improvement This book uses lenses of research policy and practice to explore these key questions and articulate what such a repositioning may look like and how it may be achieved It will prove invaluable for teachers school leaders and anyone involved in policy and educational research
