The authors conducted two experiments in 2000. Experiment 1 focused on the following two conditions: (1) the device being used (video feedback, and (2) the body part being used (dominant and non-dominant hand). Experiment 2 focused on the following two conditions: (1) the device being used (video feedback, and (2) the body part being used (dominant and non-dominant hand).

*Your radio operates with 3 AAA alkaline batteries or NiMH rechargeable batteries. The tail clip should be removed to ease installation or removal of the batteries.

1. With the back of the radio facing you, remove the bell clip (see diagram below) for easy access, then remove the Battery Cover by pressing down on the top center and sliding it down from the radio.
2. Insert 3 AAA batteries observing the polarity as shown on the Battery Compartment. Installing the batteries incorrectly will prevent the unit from operating or may damage the unit.
3. Reattach the Battery Cover by sliding it up on the radio. Replace the bell clip, unless your radio is being stored.

Your radio is equipped for using rechargeable NiMH batteries, which can be recharged by inserting the AC adapter into the radio charge jack. Initial charge time is 18 hours. Charge time is about 12 hours thereafter. For maximum battery life, we recommend charging the batteries when the low battery icon comes on. Remove the radios from the charger when the charge time expires.

1. Only use our NiMH batteries.
2. Do not attempt to charge alkaline batteries or any batteries or battery packs other than the one indicated in the manual. This may cause leakage and damage to the radio.
3. For long term storage of the radio, turn the radio OFF and remove the batteries from the radio.

When the battery voltage gets low, the **LOW BATTERY ICON** will blink along with the message "Hi Lo" on the display. When using the rechargeable battery pack, the low battery icon will indicate that you are very close to the batteries being exhausted. When using AAA Alkaline batteries, the low battery icon means you have about 50% of battery life remaining.

Your Midland radio is designed to comply with the following national and international standards and guidelines regarding exposure of human beings to radio frequency electromagnetic energy:

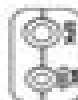

- United States Federal Communications Commission, Code of Federal Regulations: 47 CFR part 2 sub-part J
- American National Standards Institute (ANSI)/Institute of Electrical & Electronic Engineers (IEEE): C95. 1-1992
- Institute of Electrical and Electronic Engineers (IEEE): C95. 1-1993 Edition
- National Council on Radiation Protection and Measurements (NCRP) of the United States, Report 66, 1984
- International Commission on Non-Ionizing Radiation Protection (ICNIRP), 1996

To control your exposure and ensure compliance with the general population or uncontrolled environment exposure limits, transmit no more than 50% of the time. The radio generates measurable RF energy exposure only when transmitting.

If you wear the radio on your body when transmitting always use Mollard-supplied or approved belt clip, holster, case, or body harness for this product. Use of any accessories not supplied or approved by Mollard may exceed FCC/Health Canada RF exposure guidelines. If you do not use any accessories supplied or approved by Mollard, ensure the radio and its antenna are at least 1 inch (2.5cm) from your body when transmitting.
