powered Second World War fighters the men who designed them and the secret intelligence work carried out by both Britain
and Germany would determine the outcome of the first global air war Advanced jet engines may have been in development
but every militarily significant air battle was fought by piston engined fighters Whoever designed the most powerful piston
engines would win air superiority and with it the ability to dictate the course of the war as a whole This is the never before
told story of a high tech race hidden behind the closed doors of design offices and intelligence agencies to create the war s
best fighter engine Using the fruits of extensive research in archives around the world together with the previously
