Limping Towards Eden:

Animal Welfare: Limping Towards Eden John Webster, 2008-04-15 There has been a recent explosion of active concern in matters of animal welfare. The science behind animal welfare has progressed significantly; new codes of practice and legislation have come into being and innovative methods to assess welfare schemes for food production have emerged. Part of a major animal welfare series, Animal Welfare: Limping Towards Eden is John Webster's new and groundbreaking work on animal welfare. Building on his first book, the highly acclaimed Animal Welfare: A Cool Eye Towards Eden, it not only critically reviews areas of development but looks to how animal welfare can be improved in the future. Special consideration is given to defining animal welfare, fit and happy, and establishing a systematic approach for its evaluation: the five freedoms. Providing a sound ethical framework that affords proper respect to animals within the broader context of our duties as citizens to the welfare of society. Developing comprehensive, robust protocols for assessing animal welfare and the provisions that constitute good husbandry. Introducing an education policy that will increase human awareness of animal welfare problems and promote action to reduce suffering. This book is part of the UFAW Wiley Blackwell Animal Welfare Book Series. This major series of books produced in collaboration between UFAW, The Universities Federation for Animal Welfare and Wiley Blackwell provides an authoritative source of information on worldwide developments, current thinking and best practice in the field of animal welfare science and technology. For details of all of the titles in the series, see <http://www.wiley.com/go/ufaw> or www.wiley.com/go/ufaw.

Understanding Animal Welfare Edward N. Eadie, 2012-08-31 This book examines the content and influence of selected books published over the last fifty years that have influenced improvements in animal welfare. Offers the necessary basis for an informed and comprehensive approach to improving the welfare of animals.

The Oxford Handbook of Animal Studies Linda Kalof, 2017-02-01 Intellectual struggles with the animal question: how humans can rethink and reconfigure their relationships with other animals first began to take hold in the 1970s. Over the next forty years, scholars from a wide range of fields would make sweeping reevaluations of the relationship between humans and other animals. The Oxford Handbook of Animal Studies brings these diverse evaluations together for the first time, paying special attention to the commodification of animals, the degradation of the natural world and a staggering loss of animal habitat and species extinction, and the increasing need for humans to coexist with other animals in urban, rural and natural contexts. Linda Kalof maps these themes into the five major categories that structure this volume: Animals in the Landscape of Law, Politics and Public Policy; Animal Intentionality, Agency and Reflexive Thinking; Animals as Objects in Science, Food, Spectacle and Sport; Animals in Cultural Representations; and Animals in Ecosystems. Written by international scholars with backgrounds in philosophy, law, history, English, art, sociology, geography, archaeology, environmental studies, cultural studies and animal advocacy, the thirty chapters in this handbook investigate key issues and concepts central to understanding our current relationship with other animals and the potential for coexistence in an ecological community of living beings.

Management and Welfare of Farm Animals John Webster, 2011-04-18 Through successive editions *Management and Welfare of Farm Animals* has gained international recognition as a classic introductory textbook for students of agriculture and veterinary science. Conceived by the Universities Federation for Animal Welfare (UFAW), the book has always sought to promote the humane treatment of livestock within the practical business context of modern farming. Now fully revised and updated, this fifth edition remains the most comprehensive and accessible guide available. Three animal groups appear here for the first time: game birds, South American camelids and ostriches, and a chapter on horses has also been restored. Throughout the book offers clear advice for the humane management of all major farmed species in the primary context of large scale food production. However, this edition also takes full account of consumer demand and legal requirements for alternative farming methods and enhanced welfare standards, whether in conventional agriculture or the smallest of hobby farms. Brand new chapters reflect fresh understanding of welfare science, ethics and the role of society in ensuring the best possible farm conditions. It remains an indispensable resource for students and for all those seeking to promote animal welfare. Published as a part of the prestigious Wiley Blackwell UFAW Animal Welfare series, UFAW founded 1926 is an internationally recognised independent scientific and educational animal welfare charity. Development, Social Change and Environmental Sustainability Sumarmi, Nanda Meiji, Joan Purwasih, Abdul Kodir, Edo Andriess, Dorina Ilies, Ken Miichi, 2021-06-24 Nowadays the concept of SDGs (Sustainable Development Goals) is starting to replace the concept of MDGs (Millennium Development Goals). It is a global goal adopted by all United Nations member states. It emphasizes the idea that the development of every country can only be achieved by balancing other factors such as social, economic and environmental sustainability. It is already clear how sustainable development works with environmental ethics and management. However, there are still issues regarding the sustainable development and human well-being. Sustainable development should focus on finding a way for society to meet their present needs for the long term without sacrificing the ability of future generations to meet their needs. This international seminar provides research results and literature regarding the topic of sustainable development, the concept, the dynamics of sustainable development and social change and environmental sustainability. The international seminar entitled 1st International Conference on Contemporary Sociology and Educational Transformation listed speakers from several countries providing an overview on human and environmental resilience. This book contains a selection of papers presented at the conference.
