Les Nourritures Philosophie Du Corps Politique:

Les nourritures Corine Pelluchon, 2015 Ce livre constitue une tentative originale de construire une philosophie du corps politique en partant d'intuitions de Levinas sur les dimensions qui inscrivent l'existence individuelle dans un vivre de dépendances l'égard du monde des aliments d'autrui qui rompent avec toute image du sujet maître et autonome au profit d'une subjectivité toujours prise dans des relations Cette philosophie du corps implique de revisiter l'approche de l'être l'étrangement d'incarné que l'on trouvait notamment chez Heidegger Corine Pelluchon entend tirer toutes les conséquences politiques de cette philosophie qui se développe ainsi en une philosophie de la politique Mais cette philosophie ne se cache pas derrière une construction politique et sociale un nouveau contrat social qui revendique l'héritage des Lumières Locke Rousseau Le livre aborde aussi la question de la transformation de la démocratie dans un sens plus démocratique capable de faire place à ces exigences de justice de long terme envers les générations futures les animaux etc L'ouvrage explore ainsi des philosophèmes très peu abordés par la philosophie et qui affectent cependant la vie d'un grand nombre de personnes aujourd'hui la faim mais aussi la malnutrition l'anorexie et la boulimie D'autre part il tranche avec une grande part de la pensée critique contemporaine en assumant une vision ouverte la pluralité discursive et joyeuse une apologie du goût et du plaisir de manger

The Routledge Handbook of Food Ethics Mary Rawlinson, Caleb Ward, 2016-07-01 While the history of philosophy has traditionally given scant attention to food and the ethics of eating in the last few decades the subject of food ethics has emerged as a major topic encompassing a wide array of issues including labor justice public health social inequity animal rights and environmental ethics This handbook provides a much needed philosophical analysis of the ethical implications of the need to eat and the role that food plays in social cultural and political life Unlike other books on the topic this text integrates traditional approaches to the subject with cutting edge research in order to set a new agenda for philosophical discussions of food ethics The Routledge Handbook of Food Ethics is an outstanding reference source to the key topics problems and debates in this exciting subject and is the first collection of its kind Comprising over 35 chapters by a team of international contributors the Handbook is divided into 7 parts the phenomenology of food gender and food food and cultural diversity liberty choice and food policy food and the environment farming and eating other animals food justice Essential reading for students and researchers in food ethics it is also an invaluable resource for those in related disciplines such as environmental ethics and bioethics

Second-Class Citizenship Eric Mutabazi, Nathanaël Wallenhorst, 2025-05-02 A number of features of the contemporary period are preventing people from exercising their citizenship the acceleration and permanent change in the conditions shaping habitability of planet Earth the digital and technological revolution the rise of religious and political radicalisation the explosion of social inequalities the hegemony of the economic drive to maximise individual interests etc For many individuals citizenship appears to be prevented at the first hurdle What is more though officially or legally it is not possible to speak of second class citizenship so what can be done when the actors themselves use

such terminology There is something essential here which must be taken into account as a basis for thinking about the social its inequalities and its injustices The authors of this book propose the notion of second class citizenship as a way of thinking about the scale of contemporary social and political inequalities In view of this observation the contributors outline a movement based on the conviction that education is the repository of the power to prepare for the future How can we learn to build a shared world together and overcome the obstacles that prevent us from doing so How can we learn new habits of relationships marked by responsibility and hospitality The collective reflection in this book lends credence to the way in which players talk about their experience even experiencing differences in their ability to participate in the mechanisms of power This book presents empirical studies and conceptual tools for thinking about the impact of economic factors on the ways in which citizens participate in the decisions of power This book is particularly suited for educators as well as policy makers and researchers

Ethical Vegetarianism and Veganism Andrew Linzey, Clair Linzey, 2018-10-25 The protest against meat eating may turn out to be one of the most significant movements of our age In terms of our relations with animals it is difficult to think of a more urgent moral problem than the fate of billions of animals killed every year for human consumption This book argues that vegetarians and vegans are not only protestors but also moral pioneers It provides 25 chapters which stimulate further thought exchange and reflection on the morality of eating meat A rich array of philosophical religious historical cultural and practical approaches challenge our assumptions about animals and how we should relate to them This book provides global perspectives with insights from 11 countries US UK Germany France Belgium Israel Austria the Netherlands Canada South Africa and Sweden Focusing on food consumption practices it critically foregrounds and unpacks key ethical rationales that underpin vegetarian and vegan lifestyles It invites us to revisit our relations with animals as food and as subjects of exploitation suggesting that there are substantial moral economic and environmental reasons for changing our habits This timely contribution edited by two of the leading experts within the field offers a rich array of interdisciplinary insights on what ethical vegetarianism and veganism means It will be of great interest to those studying and researching in the fields of animal geography and animal studies sociology food studies and consumption environmental studies and cultural studies This book will be of great appeal to animal protectionists environmentalists and humanitarians

Handbook of the Anthropocene Nathanaël Wallenhorst, Christoph Wulf, 2023-08-21 This Handbook is a collection of contributions of more than 300 researchers who have worked to grasp the Anthropocene this new geological epoch characterised by a modification of the conditions of habitability of the Earth for all living things in its biogeophysical and socio political reality These researchers also sought to define a historical and prospective anthropology that integrates social economic cultural and political issues as well as of course environmental ones What are the anthropological changes needed to ensure that our human adventure will be able to continue in the Anthropocene And what are the educational and political issues involved Anthropocene is fast becoming a widely used term but thus far there been no reference work explaining the

thoughts of the greatest experts of the present day on this subject at the intersection of biogeophysical and socio political knowledge A scientific and political concept but which is also the conceptual vehicle for conveying the scientific community's sense of concern this complex term is explained by international experts as they reflect on scientific arguments taking place in earth system science the social sciences and the humanities What these researchers from different disciplines have in common is a healthy concern for the future and how to prepare for it in the Anthropocene and also the identification of possible anthropological changes This Handbook encourages readers to immerse themselves in reflections on the human adventure through descriptions of our differing heritages and the future that is in the process of being written

Les philosophies environnementales européennes Collectif KUBABA, 2015-12-01 Peut on parler d'une philosophie environnementale européenne Peut on unifier sous ce concept un corpus hétérogène et beaucoup plus diversifié que celui que l'on peut trouver dans la philosophie de l'environnement dans la société nord américaine Est ce qu'une unité géographique celle de l'Europe peut suffire pour garantir un dénominateur commun des conceptions philosophiques aussi diverses voire divergentes que celles qui existent sur le vieux continent

Ethique de la considération Corine Pelluchon, 2018-01-11T00:00:00+01:00 Pourquoi avons nous tant de mal à changer nos styles de vie alors que plus personne ne peut nier que notre modèle de développement a un impact destructeur sur le plan écologique et social ni douter de l'intensité des violences infligées aux animaux Relever ce défi implique de combler l'écart entre la théorie et la pratique en développant une éthique des vertus Au lieu de se focaliser sur les principes ou sur les conséquences de nos actes celle ci s'intéresse nos motivations concrètes c'est à dire aux représentations et aux affects qui nous poussent à agir Quels traits moraux peuvent nous conduire à être sobres et avoir du plaisir à faire le bien au lieu d'être constamment déchirés entre le bonheur et le devoir L'éthique de la considération prend sa source dans les morales antiques mais elle rejette leur essentialisme et s'appuie sur l'humilité et sur la vulnérabilité Alors que Bernard de Clairvaux fait reposer la considération sur une expérience de l'incommensurable supposant la foi Corine Pelluchon la définit par la transdescendance Celle ci signifie un mouvement d'approfondissement de soi même permettant au sujet de prouver le lien liant aux autres vivants et de transformer la conscience de son appartenance au monde commun en savoir vécu et en engagement La considération est l'attitude globale
