*Learning History* Maria Rose, 2015-01-06 In recent years the idea of building a learning organization has gained currency in management circles Many senior managers in particular have come to recognize that with the right approach to collective learning their enterprises can continually gain new talents and capabilities even as they weather the vicissitudes of fate Managers in middle levels meanwhile have embraced the learning organization idea because it encourages people to follow their own aspirations and in the process boost organizational performance This implies that people can reclaim a little bit of the spirit of community and personal involvement that has been leached out of conventional business decision making learn more in this book

*Why Learn History (When It's Already on Your Phone)* Sam Wineburg, 2018-09-25 Let s start with two truths about our era that are so inescapable as to have become clich s We are surrounded by more readily available information than ever before And a huge percentage of it is inaccurate Some of the bad info is well meaning but ignorant Some of it is deliberately deceptive All of it is pernicious With the internet always at our fingertips what s a teacher of history to do Sam Wineburg has answers beginning with this We definitely can t stick to the same old read the chapter answer the questions at the back snoozefest we ve subjected students to for decades If we want to educate citizens who can sift through the mass of information around them and separate fact from fake we have to explicitly work to give them the necessary critical thinking tools Historical thinking Wineburg shows us in *Why Learn History When It s Already on Your Phone* has nothing to do with

test prep style ability to memorize facts Instead it s an orientation to the world that we can cultivate one that encourages reasoned skepticism discourages haste and counters our tendency to confirm our biases Wineburg draws on surprising discoveries from an array of research and experiments including surveys of students recent attempts to update history curricula and analyses of how historians students and even fact checkers approach online sources to paint a picture of a dangerously mine filled landscape but one that with care attention and awareness we can all learn to navigate It s easy to look around at the public consequences of historical ignorance and despair Wineburg is here to tell us it doesn t have to be that way The future of the past may rest on our screens But its fate rests in our hands *Thinking History* 4-14 Grant Bage,2000 In this book the author looks at the past present and the future of history teaching in primary schools in an attempt to provide a practical framework for teachers Section one reviews relevant literature with an aim to clarify the dilemmas and advance present thinking and practice in history teaching in primary schools Section two offers case studies curriculum materials and designs teaching ideas and methods teacher development and curriculum development materials at the same time as tying it in to the existing knowledge base Section three considers the perennial dilemmas for school history in the 21st century including how can history survive in an increasingly over crowded and competitive school curriculum How can history be harnessed to improvements in literacy and numeracy What should the primary history curriculum contain How can IT secure easier access to historical information and evidence Studying History Robert Vincent Daniels,1981
