

Exercises

Chapter 1

Exercise 1.1

Suppose that chemical X is manufactured using a raw material B that is available from a location called the “mine.” Production of one ton of X requires $1/3$ of a ton of B. A firm called X Enterprises, which has a contract to deliver 30 tons of X to a location called the “market,” is trying to decide where to locate its plant. The mine and the market are 50 miles apart. Overland shipment of both X and B costs \$2 per ton per mile shipped. However, additional costs must be incurred because a river passes between the mine and the market, and the river has no bridge. Goods must be loaded onto barges to cross the river, which is located 16 miles from the mine. Barge operators charge \$1 per ton of X shipped across the river. However, since the input B is highly toxic when mixed with water, barge operators must charge an extremely high price to transport B across the river. This price defrays the cost of insurance that the operators must carry to meet liability claims should they accidentally pollute the river with their cargo. The cost of shipping one ton of B across the river is \$195.

(a) Using the above information, find the transport-cost-minimizing location for X Enterprises. The answer can be found by computing transport costs at four locations: mine, market, mine side of the river, and market side of river. As-

sume that the width of the river is negligible, so that it can be ignored. Show your work.

(b) Illustrate your results in a carefully drawn diagram like that presented in [figure 1.6](#) (use graph paper). Plot the input shipping-cost curve by plotting the input shipping costs at the same four locations as in (a) and then connecting the dots (the curve is drawn backward). Similarly, plot the output shipping cost at the four locations, and then connect the dots to generate the output shipping-cost curve. Then, plot the total shipping-cost curve by adding the input and output shipping costs at each of the four locations, plotting the points and connecting the dots. Using the diagram, identifying the best location for X Enterprises, which should be the same as your answer in (a). Note that the shipping-cost curves for this problem are straight lines with jumps at the river.

(c) Explain your results intuitively.

(d) Suppose that a bridge were built across the river, which would eliminate the cost of crossing it. Repeat (a), (b), and (c) under this assumption.

Lectures On Urban Economics Exercise Answers

Robert R. Redfield

Lectures On Urban Economics Exercise Answers:

Lectures on Urban Economics Jan K. Brueckner, 2011-09-09 A rigorous but nontechnical treatment of major topics in urban economics *Lectures on Urban Economics* offers a rigorous but nontechnical treatment of major topics in urban economics To make the book accessible to a broad range of readers the analysis is diagrammatic rather than mathematical Although nontechnical the book relies on rigorous economic reasoning In contrast to the cursory theoretical development often found in other textbooks *Lectures on Urban Economics* offers thorough and exhaustive treatments of models relevant to each topic with the goal of revealing the logic of economic reasoning while also teaching urban economics Topics covered include reasons for the existence of cities urban spatial structure urban sprawl and land use controls freeway congestion housing demand and tenure choice housing policies local public goods and services pollution crime and quality of life Footnotes throughout the book point to relevant exercises which appear at the back of the book These 22 extended exercises containing 125 individual parts develop numerical examples based on the models analyzed in the chapters *Lectures on Urban Economics* is suitable for undergraduate use as background reading for graduate students or as a professional reference for economists and scholars interested in the urban economics perspective *Lectures on Urban Economics* Jan K. Brueckner, 2011-09-09 A rigorous but nontechnical treatment of major topics in urban economics *Lectures on Urban Economics* offers a rigorous but nontechnical treatment of major topics in urban economics To make the book accessible to a broad range of readers the analysis is diagrammatic rather than mathematical Although nontechnical the book relies on rigorous economic reasoning In contrast to the cursory theoretical development often found in other textbooks *Lectures on Urban Economics* offers thorough and exhaustive treatments of models relevant to each topic with the goal of revealing the logic of economic reasoning while also teaching urban economics Topics covered include reasons for the existence of cities urban spatial structure urban sprawl and land use controls freeway congestion housing demand and tenure choice housing policies local public goods and services pollution crime and quality of life Footnotes throughout the book point to relevant exercises which appear at the back of the book These 22 extended exercises containing 125 individual parts develop numerical examples based on the models analyzed in the chapters *Lectures on Urban Economics* is suitable for undergraduate use as background reading for graduate students or as a professional reference for economists and scholars interested in the urban economics perspective *Improving Planning Education in Europe* Alex Fubini, 2004 *Municipal Journal and Public Works Engineer*, 1903 *Environment & Planning*, 1973 ***Municipal Journal***, 1903 ***Choice***, 1971 *History*, 1981 *Lecture Notes In Urban Economics And Urban Policy* John Yinger, 2017-12-22 *Lecture Notes in Urban Economics and Urban Policy* provides a wide ranging introduction to urban economics and urban policy by Professor John Yinger one of the world's leading scholars in urban economics It draws on his extensive teaching and publication record to provide detailed lecture notes for both a PhD level course in urban economics and a master's level course in urban policy

Both the US and the world populations are becoming more and more urbanized and these notes are designed to help scholars learn and teach about the factors that determine urban residential structure and that lead to urban problems such as inadequate housing concentrated poverty an inequitable distribution of local public services racial and ethnic discrimination in housing and traffic congestion Although these notes focus on the US many of the lessons in the notes apply to other countries as well They also draw on Professor Yinger s extensive teaching experience and publication record in urban economics and should prove useful to many scholars who want to teach about or study urban areas
