Marriage And Family The Of War:

The War Between the State and the Family Patricia Morgan, 2017-07-28 Patricia Morgan's core assumption is that the family is an extremely effective vehicle for raising the welfare of its members. If this is correct, it is quite possible that the state can best support the family by doing very little by not taxing the family heavily and by minimizing the subsidization of those who choose alternatives to financially self-sustaining family life. At one level, Morgan argues the family can be seen as a unit within which there occurs enormous transfer of economic resources between husband and wife, parents and children, and on a wider scale within extended families. The family is the most important vehicle of welfare and the welfare vehicle of first resort. Within the family, many services are provided by family members to each other rarely for direct personal benefit. Basic economic analysis, Morgan asserts, suggests that the family could be seriously undermined if the state provided significant support for dependents who are not brought up within self-sustaining family units and if it also provided services such as childcare that are generally provided within families. This work shows that this is precisely what has happened in the last twenty-five years. The driving force of significantly reduced family formation is not economic but social. Perhaps social changes have led to a desire by individuals to bring up children in family circumstances different from those of a generation or two ago, but evidence does not support this hypothesis. Rather, tax and benefit systems seem to be important determinants of family structure worldwide. Patricia Morgan does not simply analyze the problem; she also suggests policy solutions. The author argues that divorce laws should be reformed to ensure that those who make commitments are held financially responsible. The author's argument is compelling because it is backed up with strong evidence and is argued from an unemotional economic perspective: individuals within families are rational agents who respond to incentives.

War and Family Life Shelley MacDermid Wadsworth, David S. Riggs, 2015-12-16 This unique resource provides findings and insights regarding the multiple impacts of military duty on service members and veterans specifically from a family standpoint. Broad areas of coverage include marital and family relationships, parenting issues, family effects of war injuries, and family concerns of single service members. The book's diverse contents highlight understudied populations and topics gaining wider interest while examining the immediate and long-term impact of service on family functioning. In addition to raising awareness of issues, chapters point to potential solutions including science-based pre and post deployment programs, more responsive training for practitioners, and more focused research and policy directions. Among the topics covered: Deployment and divorce; an in-depth analysis by relevant demographic and military characteristics; Military couples and posttraumatic stress; interpersonally based behaviors and cognitions as mechanisms of individual and couple distress; Warfare and parent care; armed conflict and the social logic of child and national protection; Understanding the experiences of women and LGBT veterans in Department of Veterans Affairs care; Risk and resilience factors in combat; military health care providers; Tangible instrumental and emotional support among homeless veterans. *War and Family Life* offers up-to-date understanding for
